Donor # 4306
Interview Notes

Donor 4306 is a lithe, slim, handsome boy with a lean frame tan skin. His spiky black hair looks perfectly messed up and both his ears have 2 earrings, one on the lobe and one on the top. He came to his interview wearing a black zip-up hoodie with hand sewn patches, skinny blue jeans and black sneakers. He has slightly scruffy facial hair and a narrow face. His nose is strong and well proportioned with his high cheek bones high and dark eyes were deep set under slightly unruly eyebrows. His hands are elegant with one thin silver band on his ring finger; his fingernails were well kept. Donor 4306 knows he's cute and knows how to display that cuteness, but it doesn't come across as conceited at all. His movements are graceful and small. He looks sort of like a skinny, scruffy pre-21 Jump Street Johnny Depp with a narrower face and wider set, bigger eyes (*only* in this photo <http://www.styleofeye.com/images/johnny-depp-young-hunk.jpg>).

When asked a question, Donor 4306 answers in a soft, slightly effeminate voice. His affect is gentle and kind with just a hint of shyness that begins to disappear when he brings up his various unique talents and interests. He likes talking about his love of learning new things and following whatever current hobby capturing his attention. These things included a love for difficult and seldom used languages like Ancient Greek and Latin, along with French. He explained that he enjoyed the subtlety involved in using words of another language.

Donor 4306 is currently involved in construction. He says he always wanted to be a bartender and wound up being in the position to open his own bar where he has done all of the remodeling and construction. He is the co-owner and spends much of his time working there or on his 73 year old classic wood boat and what he terms "marine reconstruction". He loves anything that involves working with his hands, including cooking, housekeeping and wood work. His mother taught him a deep appreciation for cooking and tending to a home and this has inspired him in an ongoing way. Donor 4306 is a person with great a enthusiasm for life and someone with no desire to stop learning new things.
