Semen culture: Normal	Cystic Fibrosis: Negative	Sickle cell anemia/thalassemia: N/A
Tay Sachs: N/A	Other: CMV urine culture negative, donor is presumed non-infectious	

DONOR NARRATIVE: Donor 1717

math skills/ability: **For my schooling thru college, I had placed first in my class for Geometry and Algebra – but not for Calculus.**

mechanical skills: **Very much mechanically proficient.**

athletic skills: **Keen interest in baseball, swimming, athletics.**

musical, artistic, creative abilities: **Music appreciation – but no instruments. Inherently creative in theatre and design of all sorts and industries.**

What languages do you speak? **Primary in English. Knowledgeable in Arabic, and now learning to speak German.**

What are your hobbies, interests and talents? **Hobbies are engineering and tinkering with things around the house. Also building or rebuilding of computer components. Interests are the cinema and movie theaters. Talents are stage presence with acting, and leadership within an assembled acting troupe for staging theatre productions.**

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am a Capricorn. People tell me that I follow very closely to that Zodiac sign and its characteristics. I am probably too serious at times and also too silly at other moments. I grew up as a terrible introvert, however my survival instincts produced a well-mannered extrovert much later in life.

What are your goals and ambitions in life?

To be true to myself, my family, my friends and community. To further understand my life's work in the theatre industry and never stop learning and appreciating how full my life has already become. My last goal is to travel more of the world and to visit my family's origins in the Mediterranean.

Why do you want to be a sperm donor?

To help families realize their dreams and expand on their family tree. With the donation of my DNA in one sense, this also allows another family tree to extend its branches as well.

Did you choose to be an identity-release donor? yes no. Why did you make this choice?

To give any of the offspring that I help produce a chance to know of their origins, should they choose to seek that knowledge. Also to provide an outlet for the parents of the child to be able to contact myself, should there be a need to do so for any medical questions or needs that may arise long after the sperm donation process has closed.

What message would you like us to pass on to the people who are getting your sperm?

Just to love their children and to make sure they place special attention to how perfect the child's teeth are. I have a thing for maintaining perfect teeth and skin.
