Why do you want to be a sperm donor?

Growing up in the liberal Bay Area I have been exposed to many different lifestyles. I fully respect all life styles and understand the some relationships it is impossible to have a baby w/o help. I am willing to provide this opportunity because I would rather have children who grow up with a loving family, and if a couple goes to this extent to raise a child I condone such activity.

Did you choose to be an identity-release donor? yes no. Why did you make this choice?

I feel that this would interfere in the upbringing of the child. I understand this happens at age 18, however, I don't think that there would be a benefit. There may also be some potentially harmful affects on my own family – wife, children.

What message would you like us to pass on to the people who are getting your sperm?

I am glad that you guys have the opportunity to a child into the world and care for them. Best of luck in all of your endeavors and I hope for the best.
