HTLV 1 & 2: **Negative**

CBC: **Normal**

Sickle cell anemia/thalassemia: **Negative**

DONOR NARRATIVE: Donor 3799

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am an introvert sometimes, mostly in the morning. Extrovert most of the time. I am funny when in a good mood, which is most of the time, but can get very serious when dealing with problems. I love to laugh and love to make people feel good. People describe me as very intense, but not in a bad way, in an interesting and charming way. I always achieve my goals, and am a realist. I am not bound by material things and could fit everything I need in a backpack.

What are your special interests and talents?

Music, love to listen and love to play. I am an experienced drummer and will play the rest of my life. I have a good ear for music and have studied a lot of music. I am an artist, mostly drawing and painting. I am an experienced cook. Mostly Italian food. Love to eat and love to cook.

How would you describe your enjoyment of and skills in the following areas:

math: **I have general math skills, just enough to get me through high school and college. Do not enjoy the subject.**

mechanical: **I am somewhat mechanical. Can work on cars and computers. I like to work with my hands.**

athletic: **Love sports and am very athletic. I love to play baseball, run (track/field), swimming. I mainly enjoy hiking, camping, fishing.**

musical, artistic, creative: **Very creative in music, graphic design, art. See above.**

language (what languages do you speak?): **English and moderate Spanish.**

What are your goals and ambitions in life?

My goals are to support myself by playing music. When that does not work I will work at my current job and get by enjoying life's challenges. I will camp and hike as much of the world as possible. I don't see a family in my future, but I realize that probably will change.

Why do you want to be a sperm donor?

To help out families that would like to have a child, but can't due to complications on lifestyle. Also for the money.

Did you choose to be an identity-release donor? __yes no. Why did you make this choice?

I believe children are what you make them, and are products of their influences. The sperm I donate will help create someone else's child, not mine.

What message would you like us to pass on to the people who are getting your sperm?

I wish you to have a happy and healthy family. If I helped to do that then I will be satisfied, and may your child have better handwriting than I, sorry about that.
