Respiratory: **D: Athletic Asthma, onset age 16, self-resolved**
Skin: **D: mild Acne, used topical meds only, self resolved after middle school**

DONOR LAB RESULTS

Chlamydia: Negative	Gonorrhea: Negative	Syphilis: Non-reactive
HIV 1 & 2: Negative	CMV total antibody: Non-reactive	
Hepatitis B: Negative	Hepatitis C: Negative	HTLV 1 & 2: Negative
Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor 3904

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am an introverted type of person; I really enjoy my own space and enjoy having time to myself every so often. It can take awhile to get to know me; but once I have opened up, I can be very fun to be around. I am extremely goal oriented; if I don not have a goal I usually don't do as well in whatever I'm doing. I can be very shy towards some people; yet I have spoken and sang to crowds as large as a thousand people. Lastly I feel myself as being very adventurous, I have quite a desire to see the world.

What are your special interests and talents?

My primary field of interest is in biological sciences. I really enjoy being able to understand life on different scales. I do feel as if I am very hard working considering how much time and effort I put into school and athletics.

How would you describe your enjoyment of and skills in the following areas:

math: **I am decent in math; however I feel as if in order to understand the subject the concepts have to be engraved in my head.**

mechanical: **I really do enjoy working on projects; from fixing holes in walls to working with concrete walls.**

athletic: **I feel as if I am extremely athletic. In high school, rowing in my last year, I was MVP for the team, won the state championship, and made the finals at nationals.**

musical, artistic, creative: **I can understand and play music on a few instruments. I can be quite creative when building small tools or gadgets. However I am very inartistic and have no interest in the subject.**

language (what languages do you speak?): **I can speak English and some Spanish.**

What are your goals and ambitions in life?

My goal later in life is to become a dentist. Yet there are many things I still wish to do before I settle down into a job. After college I am planning on joining the military to serve the country and see the world.

Why do you want to be a sperm donor?

After doing a research paper on homosexual marriage/child rearing, I have come to realize that artificial insemination can be helpful to those who desire to have children. In addition I believe that in any circumstance where childbearing is difficult, artificial insemination is very helpful. And to be completely honest, as a college student it is helpful to earn some extra money on the side.

Did you choose to be an identity-release donor? X no. Why did you make this choice?

At this time I do not feel ready to reveal my identity. However I am very border line and will most likely switch. I would hate to be in the position of a child who never knew his true roots.

What message would you like us to pass on to the people who are getting your sperm?

If you truly want to conceive a child, make sure that you are ready to. I know that discipline worked very well for me, but being loved by my parents was very helpful as well; hopefully you can do the same.
