## **DONOR NARRATIVE: Donor 3945**

*The donor submitted additional/updated information on August, 25, 2008. The more recent donor narrative is located below the original narrative and denote with an asterisk (\*)*

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

**Funny, intelligent, talkative but receptive, proud and not very humble, friendly but competitive, blunt when speaking. Will often speak without thinking first.**

**\* I am an optimistic and outgoing person. I enjoy meeting new people, sharing stories, and learning more from the people around me. I love to laugh with others and I like to include everyone. I'm very relaxed but I can be very motivated and passionate about accomplishing something too. My personal philosophy is to approach every challenge with passion and desire. Whether its school work or play I will try to approach it with a passionate drive about me.**

What are your special interests and talents?

**I am involved in a multitude of physical sports. I play chess at a high level. I enjoy philosophical debates and public speaking. I enjoy riddles and intellectual challenges but will often choose physical challenges over mental ones.**

**\* I am quite athletic. I play in a multitude of sports including ultimate Frisbee, soccer, football, basketball, track, cross-country and baseball. I'm a talented chess player with a current rating of 1500+ (although I haven't played in a chess tournament for years). I enjoy role playing games, improve and public speaking. I also believe I'm a talented public speaker. I enjoy topics of philosophy and mythology and enjoy the occasional debate. I am left-handed (is that a talent? Just kidding).**

How would you describe your enjoyment of and skills in the following areas:

math:

**I've always excelled and enjoyed math through I did experience difficulties with calculus**

mechanical:

**My father and I tinkered together with various car engines, though I was never able to pick up things quickly in this area**

athletic:

**As I've said I excel in this area. Ultimate Frisbee, soccer, football, baseball, basketball (I am almost able to dunk), track, cross-country and I enjoy others. I wish I was a better swimmer.**

musical, artistic, creative:

**I have participated in many theater productions.**

**\* I played piano a bit when I was younger but strayed away. I enjoy improve and role play games like Dungeons and Dragons.**

language (what languages do you speak?):

**A little German, was once fluent in Hungarian**

What are your goals and ambitions in life?

**\* I would love to attain my degree and find a job in a hospital. Eventually, I would like to try to own a daycare. I look forward to marrying an amazing woman and raise some fantastic children. I own a house with some fruit trees that I would plant in the backyard.**

Why do you want to be a sperm donor?

**Good money and a good cause. I personally, love children and feel that everyone deserves the chance to raise children of their own. Children have brought joy to my life and I feel they shall bring me more in the future. I hope they will do the same for you.**

**\* My mom owned a daycare with I was much younger and I remember the joy my entire family experienced being surrounded by children. I truly feel that children are absolutely amazing and I wish everyone would have the opportunity to raise some children of their own.**

Did you choose to be an identity-release donor? X yes. Why did you make this choice?

**I put myself in a child's position and sympathized with him. I feel that I can handle the responsibility involved if a child comes looking for me. Although I understand that I have no obligation towards the child I still would want to make myself available to the child.**

What message would you like us to pass on to the people who are getting your sperm?

**I made a couple poor choices in my life, but my good genes have helped me to maintain a road to success.**

**\* Most areas that I pursue with a passion, I do very well in. I believe my good genes have helped me excel, but I also realize that the influence from my family and my own decisions have helped to make me become the man I am today. Good genes will only help your child in a certain point, you are the bigger factor involved in the future of your child.**
