Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor 4007

Note: The donor narrative was written by both the donor and his wife

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I would describe myself as a serious, goal-oriented, 100% business all the time type person most of the time. I tend to be an introvert-person rarely letting my guard down. I think I have a good sense of humor that tends to relax a stressful situation.

I am a kind, quiet and loving person. I do not wear my emotions on my cuff – I generally have an introverted personality. When I am at work, I am required to keep a calm, serious and often times stiff personality. The idea that I help people keeps me focused on my career and gives me great satisfaction.

When I am at home, I am a very different man! My wife and kids would describe me as a funny, helpful, loving a patient man. I do everything for the joy of my family; they define who I am. I am “full of jokes” when I am with my family – I am at my happiest when with them and it shows!

It’s hard to put my personality on paper, and even harder because I am required to act very different at work. I am quiet, and thoughtful. I think my real self comes out best when with those that I love!

What are your special interests and talents?

I enjoy anything to do with computers and new technologies. The best part of my life is spending time with my family. I also enjoy traveling when I can. I love to go hiking and enjoy the beauty of the outdoors (although I don’t like camping!). I enjoy going on afternoon drives and exploring new places. My true talents rest in my ability to relate to others. My career requires me to relate to a wide variety of personalities. I am a “people person” and have an ability to empathize with many different people.

How would you describe your enjoyment of and skills in the following areas:

math: **My worst subject in school**

mechanical: **Just ok**

athletic: **I enjoy very much. All sports, both watching and playing**

musical, artistic, creative: **Not at all**

language (what languages do you speak?): **Spanish, since high school**

What are your goals and ambitions in life?

To promote upward in my company, and maybe owning my own company. To be the best husband and father I can be. I would like to travel the world one day – and experience new places, tastes, things and people/cultures. When I retire I would like to volunteer, perhaps helping children. My wife and I also would like to adopt a child one day, in the hopes we can give a child who has nothing a gift of love and happiness.

Why do you want to be a sperm donor?

Having children has been an amazing experience, my wife and I are expecting our second daughter in February and want everyone to be able to experience parenthood. I know I have a healthy genetic background and I think everyone should have the chance to have a child.

Did you choose to be an identity-release donor? **No.** Why did you make this choice?
For our family's privacy.

What message would you like us to pass on to the people who are getting your sperm?
I would like to wish them nothing but happiness, good fortune, and good health. Enjoy every second of your new child's life – it goes by so fast. Being a parent is the best job in the world – live every moment as though it is your last.
