Cystic Fibrosis: <b>Negative</b>	Tay Sachs: <b>N/A or Negative</b>	Sickle cell anemia/thalassemia: <b>Negative</b>

[Only if reactive for CMV total antibody] Other: **CMV urine culture negative, donor is presumed non-infectious**

## **DONOR NARRATIVE: Donor #4069**

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

**I am an honest, straight forward person, curious about all sorts of things that cross my path. I love to tinker with objects, mechanical and electrical, for utility and aesthetics. I also love to tinker in ideas through reading, writing, thought and discussion. I am mostly introverted, contemplative and soft-spoken, though direct and assertive. I enjoy sharing my inner most thoughts and feelings with others. I like to laugh and sometimes cry at life's absurdities.**

What are your special interests and talents?

**I enjoy dedication to long term projects. I am self motivated in this way. I do sustained, everyday study of a Sanskrit derived language. I upkeep, organize space and do database design at the medical clinic I work in. Besides these long term commitments, I dabble in a plethora of other areas. I am an amateur juggler, unicyclist, and acrobat, soccer player, piano tuner and seamstress. I write music, sing and play the violin and the viola as well. I avidly read novels as well as some non-fiction on the brain, social services and health. I draw and make other art for loved ones.**

How would you describe your enjoyment of and skills in the following areas:

math: **I am very adept at mathematics, but after going through several years of math study in college I grew bored and realized it did not interest me.**

mechanical: **I am a general tinkerer and enjoy taking things apart to try and understand them and fix them.**

athletic: **I enjoy many traditional sports as well as dance, wrestling and acrobatics. The focus on competition and winning sometimes paired with athletics repels and annoys me greatly.**

musical, artistic, creative: **I love making music and drawing. I express myself so satisfyingly in both ways.**

language (what languages do you speak?): **English**

What are your goals and ambitions in life?

**Goals for myself are health, happiness, love, expression and intellectual stimulation. For the rest of the world I wish the same through a focus on change of current social and economic structures.**

Why do you want to be a sperm donor?

**The possibilities and ramifications of sperm donation, being a fairly new mode of reproduction intrigues me and I want first hand experience. Also there are small financial incentives that draw me.**

Did you choose to be an identity-release donor?  yes \_\_\_ no. Why did you make this choice?

**I have no reason not to. And I think it's better for a child to have the choice whether to know about a sperm donating parent or not.**

What message would you like us to pass on to the people who are getting your sperm?

**I hope that you have taken ample time to make clear in yourself that you possess the skills and resources to raise a loving, joyful, healthy child.**
