Complexion: **fair, rosy**
Body type: **medium**
Ethnic origin: **Swedish, German, Scottish, Irish**
Religion: **Religion born into: None; currently not practicing**
Blood group/Rh: **B Negative**
Baby photo available: **no**
Other defining features: **This donor has a red tint to his hair and a very red beard.**

FAMILY MEDICAL HISTORY KEY:

D donor **Ch** child **F** father **M** mother **S** sister **B** brother
Co cousin **A** aunt **U** uncle **MGF** maternal grandfather
MGM maternal grandmother **PGF** paternal grandfather **PGM** paternal grandmother

FAMILY MEDICAL HISTORY

Allergies: **D: pollen, cats, sneezes, doesn't treat. MGM: hayfever since age 30, self managed.**
Gastro-intestinal: **M: Gallstones, onset at 40, gallbladder removed, condition resolved.**
MGM: Gallstones, onset at 60, gallbladder removed, condition resolved.
Heart: **F: Abdominal Aortic Aneurism, diagnosed at 58, surgery, condition managed. PGM: Abdominal Aortic Aneurism, diagnosed at 74, complications from surgery were cause of death.**
Mental Health: **F: Depression, post-army service, self admitted to hospital at age 22, short term medication, condition resolved.**
Muscles/Bones/Joints: **MGM: Osteoporosis, onset at 84, condition managed with medication.**
Neurological: **M: Parkinson's Disease: onset at 58, managed with medication. MA: Parkinson's Disease, onset at 50 managed with medication.**
Respiratory: **F: Lung cancer, smoked as a young adult, onset at 58, chemo and radiation, cause of death at age 60. MGF: Lung Cancer, lifelong smoker, onset at 72, radiation, cause of death at 74.**
Sight/Sound/Smell: **D: Eyesight: R20/20 L20/40.**
Skin: **MGF: Skin cancer, onset at 67, removed cancerous skin. MGM: Skin cancer/ Basal cell, diagnosis at 92, removed cancerous skin.**
Cancer (see above): **F: Lung cancer. MGM: Skin cancer. MGF: Lung cancer, skin cancer.**
Other: **D: Dyslexia, onset at 7, went to a private high school for more attention, condition managed. F: Dyslexia, diagnosed at 44, condition resolved by itself.**

DONOR LAB RESULTS

Chlamydia: Negative	Gonorrhea: Negative	Syphilis: Nonreactive
HIV 1 & 2: Negative	CMV total antibody: Nonreactive	
Hepatitis B: Negative	Hepatitis C: Negative	HTLV 1 & 2: Negative
Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor # 4087

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

Upon first meeting me a person would think that I am quiet and shy, but once they get to know me they would see that I am thoughtful, caring and compassionate. They would speak of my love of animals, the attentiveness I give to my two crazy dogs and of my passion for motorcycling. They would also mention that I am very reliable and willing to go out of my way to help others in any way I am able.

What are your special interests and talents?

I am interested in designing, constructing and using functional art, and I am very mechanically inclined; I thrive on figuring out all things mechanical. This talent integrates well with my career as a motorcycle mechanic. I also enjoy being physically active: bicycling, hiking with my girlfriend and my dogs, working out at the gym or just going on walks around my neighborhood. Finally, my biggest passion is riding motorcycles, preferably to out of the way spots or on scenic country routes.

How would you describe your enjoyment of and skills in the following areas:

math: **Math has always been fairly easy for me. When I started high school I was only in pre-algebra but I was able to progress fast enough to be founding member of the school's first AP calculus course.**

mechanical: **Mechanics are my favorite areas. I am obsessed with things that transform energy into motion, and in figuring out how everything works. I have built two motorcycle engines and am working on building my first bicycle.**

athletic: **I also enjoy solo and two person sports. I like to rock climb both indoors and out, running, tennis, racquetball, cycling, weight lifting, snorkeling and exercising at my local gym.**

musical, artistic, creative: **I do not currently play any instruments professionally, but I have played instruments recreationally for most of my life. In the past few years I've been teaching myself how to play the banjo. Over the years I have studied and played guitar, bass guitar, piano, saxophone, clarinet, mandolin, didgeridoo, jaw harp, and drums. I have even built my own electric bass, and in college I was the front man of a band.**

language (what languages do you speak?): **I am not fluent in a second language, however I was at the top of my class in Spanish and spent a quarter in my undergraduate education studying abroad in Ireland where I learned Gaelic. I am fairly good at reading Spanish, but I have a hard time understanding spoken Spanish.**

What are your goals and ambitions in life?

I hope to be a supportive provider for both my immediate and extended family. I find that I derive the most gratification from helping others achieve their goals.

Why do you want to be a sperm donor?

To help others achieve their goals.

Did you choose to be an identity-release donor? yes no. Why did you make this choice?

To assist any child that should be produced from my donation to go through life with as few unsolved mysteries as possible.

What message would you like us to pass on to the people who are getting your sperm?

Read to your children often and tell them you love them.
