Muscles/Bones/Joints: **MGM: Osteoporosis, onset at 70, managed with Calcium supplements/ meds**

Neurological: **D: Migraines, onset at 22, manages with prescription medication once per month; M:**

Migraines, onset at 30, managed with prescription medication; MGM: Migraines at 40-50, related to

menopause, untreated; PGM: Alzheimer's, onset at 85, cause of death at 90 (cerebellar failure, cardiac

arrest); MGM: Bell's Palsy, onset at 88, no known treatment, symptoms self-resolved in a few months

Sight/Sound/Smell: **D: L - 20/100 R - 20/200, Adenoids removed and tubes put in ears at age 6, no further complications reported.**

Skin: **F: Pre-cancerous skin spots, removed at 50**

Substance abuse: **MU1: Alcoholism, 30s-50, now sober (manages with AA meetings)**

Cancer (see above): **PGF: Stomach Cancer; PGF: Prostate Cancer; MGF: Prostate Cancer**

DONOR LAB RESULTS

Chlamydia: **Negative**

Gonorrhea: **Negative**

Syphilis: **Nonreactive**

HIV 1 & 2: **Negative**

CMV total antibody: **Positive**

Hepatitis B: **Negative**

Hepatitis C: **Negative**

HTLV 1 & 2: **Negative**

Urinalysis: **Normal**

Chem panel: **Normal**

CBC: **Normal**

Cystic Fibrosis: **Negative** Tay Sachs: **N/A**

Sickle cell anemia/thalassemia: **Negative**

Other: **CMV urine culture negative, donor is presumed non-infectious**

DONOR NARRATIVE: Donor 4089

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I'm generally an introvert, but very social among friends. I have a sense of humor often rooted in the esoteric, but that doesn't mean I ignore the topical. I have been told I have an attractive personality, meaning people are drawn to me, but I imagine it's a bit more subtle than that sounds. I warm to all different kinds of people, and I tend to swim from one group of friends to another, bringing them all together when possible.

What are your special interests and talents?

I have always been interested in visual arts. I started drawing and painting as soon as I could grip a brush. I continue to draw and make prints. My mother was a music teacher, and I have played musical instruments from a very young age. I listen to music daily and have some natural or learned skill for melody and harmony. I'm also fond of cooking and trying new foods.

How would you describe your enjoyment of and skills in the following areas:

math: **I always had a natural aptitude up through pre-calculus in high school, but I had not particular interest in the subject.**

mechanical: **My spatial relation skills are pretty strong. I've worked on cars some, and I can generally intuit problems with simple mechanics like plumbing or manual machinery.**

athletic: **I enjoy most physical activities, but I usually stick to non-competitive sports like running or yoga. I played soccer, baseball, football and tennis through high school.**

musical, artistic, creative: **I love music and visual art. I've played bass in jazz and rock groups since middle school, and before that I played cello and piano. I've always drawn and painted, and I imagine I will until I die.**

language (what languages do you speak?): **Latin, ancient Greek, some Spanish**

What are your goals and ambitions in life?

My goals and ambitions are relatively modest. I want to have a home with enough land to grow vegetables and some fruit trees, I want to have a close family and close friends nearby. I plan to make a living in a creative field, either design or as a studio artist.

Why do you want to be a sperm donor?

I have a very good friend from college who was born because of sperm donation. The idea that I could help a loving family or mother bring someone into the world who would be as good a friend to someone as my friend is, this idea makes it seem like a wonderful thing to do.

Did you choose to be an identity-release donor? Yes. Why did you make this choice?

I'd want to know my own health history and to be able to learn more about my genetic heritage if I were in the child's position.

What message would you like us to pass on to the people who are getting your sperm?

Best wishes to your family! I hope you all bring each other great happiness and love.
