Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: Negative	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor # 4101

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am a joking and caring extrovert with friends and family. I make sure I enjoy everything it life. I am able to thrive in a fast paced business environment. I am much happier when I have a variety to my day. "Work" is a place for me to direct the intense need I have to accomplish my goals. I am a life learner, and in addition to finishing my BA I am working towards obtaining knowledge in my other interests- music, technology and psychology.

What are your special interests and talents?

I enjoy long runs at the beach. I enjoy raising animals. I enjoy fostering a fantastic relationship with my girlfriend (and future wife). I maintain an extensive home theater for my home movie watching. I also enjoy playing casually in a jazz/rock hybrid band with friends.

How would you describe your enjoyment of and skills in the following areas:

math: **Minor in Math.**

mechanical: **Networking Engineer- also enjoy mechanics (auto).**

athletic: **Enjoy soccer and running.**

musical, artistic, creative: **Play bass guitar, drums and piano. I also enjoy drawing.**

language (what languages do you speak?): **Spanish**

What are your goals and ambitions in life?

I am finishing my degree and want to head back into law enforcement. I enjoyed making a difference in people's lives and making the world a safer place. My current business is thriving (retail/optometry) and I continue to set the bar higher and celebrate my employees' successes. I want to ensure I am financially able to retire with my future wife comfortably near the ocean with our pets and travel plans.

Why do you want to be a sperm donor?

My girlfriend and I have decided not to have children and I wanted to pass on my genetic heritage. I have professional models on both sides of the family with an overall healthy family history. I also am earning a little extra money to quickly pay off remaining debt so I can start saving for retirement.

Did you choose to be an identity-release donor? **X** Yes Why did you make this choice?

I believe any child created through this program has a right to know their genetic and health lineage. My girlfriend was adopted and her genetic parents did not leave any future contact information. While she has a limited health history to work with as of her birth, she has always wanted to know more about her genetic parents health and life experiences. I want to give any genetic offspring of mine the choice to find out how my life and health prospered when they're old enough.

What message would you like us to pass on to the people who are getting your sperm?

Look onto every challenge as an opportunity- life is what you make of it. Take a step back every now and then to recalculate if a choice or situation will make you happy; if not you have the power to change it!!
