DONOR NARRATIVE: Donor # 4339

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am a very easy going person. If someone made a mistake I forgive them easily. I don't hold grudges against people. I am a serious and at the same time a funny person. I believe in taking life as it comes but at the same time focused about what I need to accomplish in life. I don't believe in racism, I think all people are equal regardless of their skin color. I am not a movie person and also not a drama guy. I usually speak what my heart tells me to speak. In many situations I use my heart more than my brain to make decisions, meaning, if I like something and I have the money I will buy it. I am good with my finances and a really hard worker and party lover.

What are your special interests and talents?

I am really good in mathematics, also I enjoy solving real world problems, I guess that's why I am doing engineering. I love water sports especially jet skis and I am a bike lover especially sports bikes which can go 160 mph. I love to hang out with friends and I love my family. I also like to learn new things and new ways of doing things. I work great technology.

How would you describe your enjoyment of and skills in the following areas:

math: **Love it! I love how simple numbers can be a solution to such complicated real world problems.**

mechanical: **Anything that's moving, I love! I always want to open it up and see how exactly the movement is happening.**

athletic: **I used to be big on athletics but now not anymore. I love to watch cricket, my favorite sport. I play cricket, soccer, and field hockey.**

musical, artistic, creative: **I wish I knew how to read and play music, but I still love any music that has good lyrics and beats. Not really artistic and average creative.**

language (what languages besides English do you speak?): **Hindi, Punjabi**

What are your goals and ambitions in life?

I want to get my undergraduate degree in mechanical engineering and then find a job. I would like to work in the industry for four, five years and then go for my MBA. After which I plan to startup company with my friends in consulting as engineers.

Why do you want to be a sperm donor?

I want to be a sperm donor because I feel that people should have independence in life to live however they want. Especially for ladies if they want to be a single mother they should get the opportunity. Also financially it helps me too.

Did you choose to be an Identity-Release® Program donor? X Yes ___ No. Why did you make this choice?

I want to see how my offspring are going to be like.

What message would you like us to pass on to the people who are getting your sperm?

Life is short, enjoy it while you can.
