Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle Cell Anemia/Thalassemia: N/A

DONOR NARRATIVE: Donor # 4453

Describe your personality: introvert, extrovert, funny, serious, goal-oriented, curious, shy, etc.

I consider myself a very honest and trustworthy person. I am not outgoing necessarily but very open to new people and experiences. Still I am very serious about my health, academics, and finances but still find time to have fun and relax with my friends. I keep a journal and frequently discuss local and world events with my peers.

What are your interests and talents? **I really enjoy writing, as well as athletic activity. I spend a lot of time with my friends doing various activities both social and academic. I enjoy strategy games and go to a shooting range about once a month. I'm good at football and volleyball as well as the guitar.**

What are some of your goals and ambitions in life? Where do you see yourself in 5 or 10 years? **Upon my graduation in 2011 I will be enlisting in the U.S. Army as a U.S. Army Ranger Infantryman. It will be a four year enlistment period, after which I am not sure what I will do. I could choose to apply to Officer Candidate School to become commissioned as a Second Lieutenant, or I could reenlist. I could also apply for some sort of job using my bachelor's degree and Army experience. I will have to wait until after my enlistment to see where I stand.**

How would you describe your skills and interests in the following areas?

Math: **Furthest I took math was Calculus, not very interested in it.**

Mechanical: **I'm very good with computers and bicycles. I took several woodshop and craft classes as well.**

Athletic: **I was recruited to a Division I college for 110m sprints, but declined due to lack of interest in competitive running.**

Musical, Artistic, Creative: **I'm not very artistic. I play the guitar however and enjoy it. I am a creative writer.**

Language (what languages besides English do you speak?): **I took three years of Japanese in High School. It was a lot of fun.**

Writing: **I love writing and have written many short stories and have always gotten A's in English and History. I hope one day to write a science fiction novel.**

Literature: **I love to read as well and frequently can be found reading. I read a book for pleasure each month on top of my studies.**

Science: **I like physics a lot but do not care for chemistry. Biology is fun as I am interested in the natural world.**

If you were stranded on a deserted island and could only have one book, one movie and one album, what would they be?

Movie: **District 9- definitely going to be a Sci-Fi classic**

Book: **The Madness Season**

Album: **Dark Side of the Moon**

What are some of your reasons for becoming a sperm donor? **Mainly because I don't know what will happen when I am in the Army. As a U.S. Army Ranger I will be on the most dangerous missions and have to accept the possibility of death. I want to ensure that at least some part of my family lives on, and that those who are eager to have a family of their own have the option to do so.**

Did you choose to be an Identity-Release® Program donor? Yes No

Why did you make this choice? **Initially I was skeptical as I was unsure of how releasing my identity would affect me later in life, but after having thought it over I decided that it would be unfair to the children to not know anything about me for the duration of their entire lives.**

Would you like more information on our Identity-Release® Program? Yes No
(Donor did not answer)

Is there anything else you would like to share with participating families and offspring?
