**Donor # 2274
Interview Notes**

It was a pleasure interviewing donor 2274 today. I find him shy and charming. After speaking with him for awhile I also discovered him to be direct, receptive and humorous. 2274 was great to interview and I highly recommend him to be approved as a donor.

Interviewer: Elizabeth Long

Date: 4-30-99

Previously, staff simply wrote a recommendation, not interview notes. In an attempt to provide more information, we have included a description of the physical characteristic of the donor.

Donor 2274 is tall and lean and would be considered of slight build. Based on his photo, I would even call him skinny. His face is narrow and oval shaped with an angular chin and nose. His nose is slightly off center when you look at his photo straight on but is still very proportionate to his face. His ears are small and rather cute. In this photo, donor 2747 has light facial hair which is brown. His short spiky hair is the same color and looks slightly groomed.. Donor 2274 has an acne breakout in this photo. This is an older photo and it is possible that this has been resolved. Overall, this donor comes across as young, casual and good looking.
