**Donor 2597
Interview Notes**

Donor 2597 describes himself as artistic with a capacity for analytical reasoning. His hobbies include street circus performance art—in which he stilt-walks, juggles random objects, rolls a crystal ball up and down his arms, and leads group story-telling—and building art structures.

Handsome, tall and lean, donor 2597 has a long face, full, red lips, and large, beautiful blue eyes. He has a thick head of lush hair and noted that nobody is bald in his family.

Formerly introverted, he became more extroverted in his twenties. He prefers to do projects with intensity or not at all. I found him engaging and good-humored with moments of shyness.

Interviewer: Tasha Wilson

Date: March 12, 2002
