Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative
Other: CMV urine culture negative, donor is presumed non-infectious		

DONOR NARRATIVE: Donor 3030

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I would describe myself as very outgoing, proactive and an extrovert. I have always been a very caring and understanding person. I find that people are very comfortable around me. I am usually the person someone would come to with a problem. I also think that I am a very goal-oriented person. I have set future goals and accomplished many. If I am confronted with a problem I am able to solve it in a logical and analytical manner.

What are your special interests and talents?

I have many interests. Some of my interests are movies and filming, and being a food connoisseur. I enjoy and admire high end automobiles. As a young kid I have always been into business, started up some small business here and there. One of my successful businesses would be my car consulting firm.

How would you describe your enjoyment of and skills in the following areas:

math: **fairly good at this subject all years of schooling.**

mechanical: **custom club fitting and manufacturing golf clubs for PCTA Tour players, a business that my friend and I started.**

athletic: **golf, tennis, basketball. Played golf and tennis all through high school.**

musical, artistic, creative: **drums, violin, saxophone. Played in high school band and orchestra.**

language (what languages do you speak?): **Korean, French, Spanish, Italian, English. I have touched each language from either schooling or travelling.**

What are your goals and ambitions in life?

I have many life's goals. Some are to finish college, go to medical school and become a cardiac and thoracic surgeon. Becoming a doctor means many things to me. It means respect, helping people and giving life to people who are less fortunate.

Why do you want to be a sperm donor?

I want to help families that cannot have children. Helping couples, single parents, whoever are less fortunate.

Did you choose to be an identity-releasesm donor? __ yes no. Why did you make this choice?

I am doing this to help families who are less fortunate and want to have a family. As much as I would love to know if I had started a family I would like not to be notified because I would like to have my own family one day and I would be extremely uncomfortable to know that I had another child in another family when I will have a family in the future.

What message would you like us to pass on to the people who are getting your sperm?

Make sure that you are ready mentally and physically to have a child. Be well assured that you will treat the child with love and respect and not abuse or neglect them.
