**Donor 3421
Interview Notes**

Donor 3421 struck me as a very practical, go-getting man. He grew up in an affluent professional family in India, and didn't have to work as a young man. He studied science in school and still enjoys reading about science, medicine, and health. However, his real ambition was to be an actor, as he has always enjoyed performing. He moved to the US at age twenty-five in order to pursue his dreams and learned to support himself with a variety of jobs, including working as a security guard, in restaurants, and with occasional modeling gigs. He noted that the lifestyle change has been challenging, but that it is worth it to him to be able to study acting, which would have been impossible to do at home in India.

He remains close with his family, particularly his older brother. His parents visit him once or twice a year. He is proud of the work his mother did as a supervising Nurse in a rural area and of his father, a history teacher.

Donor 3421 is quite attractive, with large liquid eyes, charming dimples, and a warm smile. He is very fit and clearly takes good care of himself, eating well, exercising regularly, and avoiding drugs and alcohol.

Interviewer: Cathy Winks
