CBC: **Normal**

Cystic Fibrosis: **Negative**

Tay Sachs: **Negative**

Sickle cell anemia/thalassemia: **Negative**

Other: **CMV urine culture: Negative, donor is presumed non-infectious**

DONOR NARRATIVE: Donor 4011

Describe your personality:

I am often described as serious and as funny, depending on the person or situation. I was very ambitious and curious from a young age. I've always been very passionate about learning, creative projects, self-growth, making a contribution. My sense of humor is very dry, bordering on sarcasm. I have many close friends and get a lot of joy from my relationships. I am still close with my parents and grandparents, though I live far away. I tend more towards introversion and contemplation, but have a definite extrovert side as well.

What are your special interests and talents?

I have been strongly involved in spiritual growth and study in various traditions. I am a voracious reader, and I compose music, write, and have been a filmmaker. As a child I tested with a genius-level IQ (as have my brother and father) and always learned and scored higher and faster than most other kids. I still tend to be over-ambitious, taking on many projects at once.

How would you describe your enjoyment of and skills in the following areas?

math: **I teach SAT math for a living. Otherwise I stopped learning math in 11th grade Trigonometry.**

mechanical: **Not my strong suit.**

athletic: **I've played basketball, football, tennis, and have ran and worked out throughout my life.**

musical, artistic, creative: **I've played piano since age 6 and currently compose music for film, and have done film directing.**

language (what languages do you speak?): **Some Hebrew, some Spanish.**

What are your goals and ambitions in life?

I am beginning Graduate School in Psychology. I would like to be a healer and guide, a father and husband, an artist. Most of my goals are more spiritual and internal these days. I have taken on many leadership roles in my life and would like to do so again.

Why do you want to be a sperm donor?

I suppose it's just simply that I'm in a position to help people who want to be good parents. I feel that my genes and my family are strong and can make a positive contribution to the world.

Did you choose to be an identity-release donor? **YES.** Why did you make this choice?

If I was the child I would want to know more about the donor.

What message would you like us to pass on to the people who are getting your sperm?

Treat your child with great love and respect. Treat yourselves and each other the same. I wish you great fortune and happiness.
