Gonorrhea: **Negative**

CMV total antibody:

Hepatitis C: **Negative**

Chem panel: **Normal**

Tay Sachs: **N/A**

Syphilis: **Nonreactive**

Nonreactive

HTLV 1 & 2: **Negative**

CBC: **Normal**

Sickle cell anemia/thalassemia: **Negative**

DONOR NARRATIVE: Donor # 4117

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I would say someone would describe me as quiet and kind of serious at first. Once they got to know me though, they would describe me as a kind, funny person. I am a loyal friend and put a lot of value on all my relationships. I would not describe myself as a cool guy, or as someone that is very social. With most people I am fairly awkward for a while, until I get really comfortable and am no longer intimidated by the people around me. A lot of people my age somewhere get the idea that the louder they are, the more funny they are; I keep my mouth shut until I have something good to say. I've been told that I am a good listener. I am passive, but not passive aggressive. I'm generally a happy person.

What are your special interests and talents?

In middle school I was really into video games and skateboarding. Once I got into high school I was only interested in skateboarding and in the band I was in. Now I have found that I have a passion for making beer. I'm not quite sure yet, but I think it may be what I want to do for a living.

How would you describe your enjoyment of and skills in the following areas:

math: **I do not enjoy it at all, but I'm pretty good at it.**

mechanical: **I enjoy building things, and I thought that I was good at it, but recently an aptitude test told me otherwise. I don't know what to think.**

athletic: **I am an average athlete, but I don't usually enjoy organized sports.**

musical, artistic, creative: **I really like playing and writing music. I play the guitar and the bass and I'm currently in two bands.**

language (what languages besides English do you speak?): **None**

What are your goals and ambitions in life?

My goals right now are to graduate from college, find a job that makes me happy, and meet someone that completes me (as cheesy as that may sound).

Why do you want to be a sperm donor?

Honestly, for the money. Right now I am basically living paycheck to paycheck so making money by donating sperm sounded pretty good. I do believe that what I'm doing is a good thing, but I would not be doing it for free.

Did you choose to be an identity-release donor? **Yes.** Why did you make this choice? **I chose to be in the Identity-Release® Program because I thought it would be interesting to meet my offspring, and also I wanted to continue donating.**

What message would you like us to pass on to the people who are getting your sperm?

Thank you for choosing me to be the biological father of your child. I hope my sperm is extremely fertile and you have a beautiful, healthy baby.
