Donor # 4253
Interview Notes

Donor 4253 looks very much like a freshman in college. Dressed in casual, athletic clothing, a baseball cap and a lightweight jacket, he blended well with the rainy weather outside. I noticed his pale skin magnifying his grey-green eyes, making them seem a stone grey, flecked with blue and black. He has a graceful manner, clear skin and nicely proportioned angular features. Donor 4253 is a very handsome young man.

Donor 4253 is passionate about sports. He talks about athletics and competing in many different places. I asked him what it was about sports that he finds so appealing and he responded 'I got into sports from watching the Olympics [at age 6]. I get an adrenaline rush and I like the challenge and staying in top shape.' His dedication, discipline and love for sports and completion is clear.

Donor 4253 spoke freely about his schooling and family and seems intent on providing whatever information he can to compile a good Donor history. He even got on his phone to call his mom when I asked him for more information. He spoke very openly to her and it was clear that he had shared his choice to be a donor with her. When asked he explained that he and his mom were very honest with each other and always have been. She supports his decision to be a donor and trusts that he knows what he's doing. I found his decision to be a donor very thought-out and well-intentioned.
