Cystic Fibrosis: <b>Negative</b>	Tay Sachs: <b>N/A</b>	Sickle cell anemia/thalassemia: <b>Negative</b>

## **DONOR NARRATIVE: Donor # 4393**

Describe your personality: introvert, extrovert, funny, serious, goal-oriented, curious, shy, etc.

**I am a person who is always looking to make others laugh and smile. My friends and family would say that I am extremely loyal to my loved ones. They would also classify me as an extrovert because I love to express myself verbally, but I'm also very self-reflective. This aspect of my personality has certainly helped shape my personal growth. Next, they would describe me as honest. My friends also know me as the 'Trivia Whiz' of the group, because I'm very good at retaining random information (Hello Jeopardy!). Finally, the people who know me would tell you I'm driven. When I create a goal I always follow through.**

What are your interests and talents?

**The love of my life has always been music. I began playing the drums at age five. I've always felt a connection with the emotional expressiveness of music, and I find it incredible that a song can make a person feel, visualize, and sense so many different things.**

**Additionally, I'm a huge fan of sports, both watching and playing. More recently, I've become more and more interested in the mental aspect of competitive sports. I'm fascinated by the mental fortitude it takes excel and by the more cerebral athletes who are able to outsmart their opponents.**

**Finally, I'm a bit of a nerd for superhero fiction. I enjoy the way it expands the imagination by making the impossible possible.**

How would you describe your skills and interests in the following areas?

Math:

**I've always excelled at math, from everyday number crunching to collegiate level mathematics. I have also had a fascination for the patterns that emerge in numbers.**

Mechanical:

**I broke many toys as a child by taking them apart to see how they worked. I have become much better at fixing things since then, and enjoy being handy.**

Athletic:

**I love sports as both a way to keep fit and a fun activity. I grew up playing baseball, and a little football. More recently I have taken up cycling and love it!**

Musical, Artistic, Creative:

**My musical background has already been documented, but outside of that I relish the opportunity every opportunity to use my imagination and be creative. I'm not much of an artist, but I love coming up with ideas that have inspired the art of others.**

Language (what languages besides English do you speak?):

**None.**

What are your goals and ambitions in life?

**It may sound cliché, but I want to have an adult life that is like my dad's. He used determination and a lot of hard work to rise through the ranks of his current job. He loves what he does and he's incredibly good at it, and he's well respected by his colleagues. At home, he is in a loving relationship with my mother, and he has been able to provide for his family every opportunity to make the most out of life while still teaching us the values that helped him succeed. I'm still trying to figure out what my path in life is, but I look at my dad and I know I want my destination to be.**

What are some of your reasons for becoming a sperm donor?

**Personally I've had the opportunity to work with and got to know a woman in a same sex relationship who is in a same sex relationship who is having a child with her partner. Having thought about her situation, it occurred to me that there are many people who cant have children but would make excellent parents. I want to participate in this program so that I might help them bring children into loving families.**

Did you choose to be an Identity-Release® Program donor? Yes \_\_\_v No

Why did you make this choice?

**I would like more information before I commit to the I.D. release program.**

Is there anything else you would like to share with participating families and offspring?

**I wish you the best of luck welcoming one more to your family and embarking on a tough but incredibly rewarding journey! Also, my mother said that I didn't cry much and slept a lot as a baby.**
