\*Other: **CMV urine culture is negative, donor is presumed non-infectious**

## **DONOR NARRATIVE: Donor # 4398**

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

**I could be described in many different ways and depending on the person. Objectively speaking though, I am a very extroverted and outgoing person. Like the rest of my family, I am a people person, I love being around people and having a good time. I am very full of life. I know what I want to do in the future and am very motivated and determined to get there. I usually always have a smile on my face, even when times are bad. I am also a very giving and generous person. Seeing people happy is what makes me happy. I am involved with many philanthropic and charitable organizations and programs, in fact. In addition, people that know me generally know that I am a good friend and someone who can be trusted.**

What are your special interests and talents?

**I have a variety of talents and special interests. First of all, I am a musician of 13 years. I play guitar, saxophone, drums, harmonica, vocals, and dabble with other instruments that I can get my hands on. Secondly, I am a fabulous cook. I cook every night for my roommates and am getting better every meal I cook. I take special interest in politics and current affairs, and try to involve myself with shaping the world in a positive way. I am very skilled with communication and networking (hence the fact that I am a people-person) and I have a random ability to do mathematics.**

How would you describe your enjoyment of and skills in the following areas:

math: **I am a very good with math. It does not take much for me to understand math, particularly Calculus. I enjoy math, but not enough to make a career out of it.**

mechanical: **I think mathematics are interesting, but I know nothing about it.**

athletic: **I am very physically fit based on good genes, and also taking care of myself every day. I've played ice hockey, soccer, tennis, football, cross-country and track.**

musical, artistic, creative: **Music is my passion and will always be a part of my life. I enjoy and play all forms of rock-and-roll and I will be a famous rock star in about 10 years.**

language (what languages do you speak besides English?): **Spanish**

What are your goals and ambitions in life?

**I have many goals and ambitions. Generally speaking, I would like to be very actively involved in political organizations that try to reshape and reform the world in regards to economic systems and bureaucratic institutions. In addition, I will always pursue giving to the world and helping people globally through hard times. Specifically speaking, being that music is my passion and I am a business major, it is my dream to become an artist representative and be involved in the music industry.**

If you were stranded on a deserted island and could only have one book, one movie and one album, what would they be?

Movie: **The Shawshank Redemption**

Book: **Lord of the Flies**

Album: **Dark Side of the Moon- Pink Floyd**

Why do you want to be a sperm donor?

**As mentioned before, my life is devoted to helping and contributing as much as I can to the world. I cherish making people happy. I know that there are many homosexual couples who want to raise a family, but are very limited based on several factors. I am very happy to help these couples, and I know that with my good, healthy genes, and the kind of person I am as well as my family, these potential families can become very successful and love filled families.**

Did you choose to be an Identity-Release® Program donor?  Yes  No

Why did you make this choice?

**I enjoy contributing to those who require external help with personal endeavors. I want to keep contributing for as long as my services are useful to others. I also would very much like to meet those that share my blood and genes at some point.**

What message would you like us to pass on to the people who are getting your sperm?

**I would like to tell future happy families that they are making the right decision. First off all, I am healthy. My family has great genes and no generational problems. Secondly, I, as well as my family, am a good person. I treat people with respect and appreciate love that is given to me. The future parents will find themselves with a healthy child who will love them and listen to them. Their child will be attractive, smart, talented, and generally a good child who will make his/her parent's lives much better.**
