| Urinalysis: Normal | Chem panel: Normal | CBC: Normal |
| Cystic Fibrosis: Negative | Tay Sachs: N/A | Sickle cell anemia/thalassemia: Negative |

DONOR NARRATIVE: Donor # 4412

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

They would have to start with my close circle of family and friends. I am very close with my family and have had the same tight group of friends since childhood. On the introvert-extrovert scale I would fall more on the side of introvert, but not close to the point of social recluse. I am someone who likes to be out socializing, but also finds joy in solitude. If one were to describe my sense of humor it would fall on the side of witty bordering on dark. I like to think of myself as clever and naturally bright.

What are your special interests and talents?

I have a newfound love for fiction and am a voracious reader. I mostly find myself reading fiction, philosophy, and economic theory. I also like writing and jot things down in my notebook daily. I love to travel, but even more so enjoy living in foreign countries for extended periods of time, having lived in Spain and England in the past. I try to live by the motto that those who have not experienced can only make assumptions.

How would you describe your enjoyment of and skills in the following areas:

math: **Not only do I deplore math, but I have no talent for it whatsoever.**

mechanical: **I work on my own car regularly, and even though it's all I can do to keep it from dying. I enjoy it a lot.**

athletic: **I've played lots of sports since I was little I'd call myself an above average athlete with my claim to fame of being voted captain of my high school football team.**

musical, artistic, creative: **I love listening to music and am prideful of my music collection, but possess no musical talent. I like to write short stories in my free time.**

language (what languages do you speak?): **Conversational Spanish.**

What are your goals and ambitions in life?

Having just completed my Bachelors degree I am fully aware my education is far from complete. I want to eventually complete my own PhD in development economics. In the meantime I hope to continue writing and would like to see some of my stories published. I also hope to live in as many interesting locations as possible, all without losing my connection to home.

Why do you want to be a sperm donor?

I would be lying if I said that financial reasons weren't a major motive. But I see the opportunity to provide a child for two well-intentioned and deserving parents as gratifying.

Did you choose to be an Identity-Release® Program donor? Yes No

Why did you make this choice?

As of now I am giving a 'soft no,' just to err on the side of caution. I have no idea what my situation will be in 18 years so at this point I will say no.

What message would you like us to pass on to the people who are getting your sperm?

(Donor did not include an answer)
