Cancer (see above): **MGF: Skin Cancer**

Other: **D: Hernia, onset at 2, surgery, condition resolved. PGF: Hernia, onset at 60, surgery, resolved. PGM: Appendicitis at 14, appendectomy, resolved. PA#1: Appendicitis at 34, appendectomy, resolved.**

DONOR LAB RESULTS

Chlamydia: **Negative**

Gonorrhea: **Negative**

Syphilis: **Nonreactive**

HIV 1 & 2: **Negative**

CMV total antibody: **Nonreactive**

Hepatitis B: **Negative**

Hepatitis C: **Negative**

HTLV 1 & 2: **Negative**

Urinalysis: **Normal**

Chem panel: **Normal**

CBC: **Normal**

Cystic Fibrosis: **Negative** Tay Sachs: **N/A**

Sickle cell anemia/thalassemia: **Negative**

DONOR NARRATIVE: Donor # 4416

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.). How would someone describe you?

According to my mom- smart funny, ambitious, musically talented, cocky, strong, devoted, eager to learn, extrovert. According to my girlfriend- outgoing, weird, funny, strong, smart, attractive. I'm mostly extroverted. I enjoy talking to people and making them laugh. I can be serious when I need to be, but I try not to take myself too seriously. I am very curious and I love to learn. I have a lot of goals. Often times the hardest part is finding time to accomplish all of them.

What are your special interests and talents?

I really love music. I play guitar, drums, and bass, and I'm learning how to play piano. I am deeply interested in philosophy along with technology. I have some unusual talents. I can juggle and ride a unicycle. I also practice acrobatics (mostly flips). I also like to draw. I love almost anything that involves creativity. My biggest passion is writing music. I also love learning new "skills." I love comedy and humor.

How would you describe your enjoyment of and skills in the following areas:

math: **I enjoy math to an extent. I like using math to understand things but I dislike doing math simply for the sake of doing math. I'm fairly good at math.**

mechanical: **I'm interested in the scientific side of mechanics. I used to want to be an "inventor" when I was little.**

athletic: **I'm fairly athletic. I played soccer for 8 years. I've skateboarded since I was five. Currently I practice acrobatics. I go to a studio almost every Saturday.**

musical, artistic, creative: **I love all things creative, especially music. I love to draw and to write music.**

language (what languages do you speak?): **None**

What are your goals and ambitions in life?

I would eventually like to be in a band recording albums. I would like to make enough money to afford to do the things I love, but I don't want to end up working a 9 to 5. I want to have a career creating something whether it be music or some other outlet. I'm currently a business major and one day I hope to own my own recording studio.

Why do you want to be a sperm donor?

I'll be honest; I'm a college student and I need a source of income. The pay is good, and other jobs are hard to find in today's economy- especially with little experience.

Did you choose to be an Identity-Release® Program donor? Yes No

Why did you make this choice?

If I were in the child's position I would want to know who my biological father was. There is also some level of curiosity on my part.

What message would you like us to pass on to the people who are getting your sperm?

I hope it's everything you expected. (I don't want to give any parenting advice, but from personal experience I feel that sometimes it's best to let kids be kids, and sometimes the best way to learn something is "the hard way.") Enjoy!
