- Religion: **Atheist**

PHYSICAL CHARACTERISTICS

- Height: **6'2"**
- Weight: **188.5**
- Hair color: **Dark blond**
- Hair type: **Curly**
- Eye color: **Light brown**
- Complexion: **Fair/creamy**
- Body type: **Medium**
- Blood group/Rh: **O+**
- Baby photo available: **Yes**
- Other distinguishing features: **Strong jaw**

FAMILY MEDICAL HISTORY

KEY: D donor Ch child F father M mother S sister B brother
Co cousin A aunt U uncle MGF maternal grandfather MGM maternal grandmother
PGF paternal grandfather PGM paternal grandmother

Allergies: **D: allergy to passion fruit (raw) at 14, treated with avoidance, managed.**

Gastro-intestinal: **F: Appendicitis at 54, treated with surgery, resolved.**

Genital/Reproductive: **M: Endometriosis, uterine fibroids at 42, treated with hysterectomy and oophorectomy, resolved. F: Hypospadias (urethral opening displaced, mild) at birth, no treatment needed, managed. MGM: Ovarian cancer at 62, treated with hysterectomy and oophorectomy, remission until death at 72 from metastases. MGF: Prostate cancer at 72, treated with chemotherapy, ongoing until death at 90.**

Heart: **M: High blood pressure at 50, treated with medication, diet and exercise, managed. PGF: Heart attack at 85, treated with by-pass surgery, managed, now 90. PGM: Arrhythmia at 69, treated with pacemaker, managed. PGM: Heart failure at 86, treated with prescription medication, managed, now 90.**

Mental Health: **D: Attention deficit disorder at 7, treated with medication, resolved at 14. MU: Depression at 21, treated with medication and therapy, managed.**

Neurological: **MGF: Alzheimer disease at 86, treated with prescription medications, ongoing until death at 90.**

Sight/Sound/Smell: **D: Right eye 20/15, Left eye 20/15. MGF: Glaucoma at 65, treated with prescription eye drops, managed.**

Skin: **M: Skin cancer (basal cell, face) at 52, treated with surgical removal, resolved. MU: Skin cancer (basal cell, face) at 55, treated with surgical removal, resolved.**

Urinary: **PU: Bladder cancer at 57, treated with cystoscopy, resolved.**

Cancer (see above): **M: Skin cancer (basal cell, face) PU: Bladder cancer. MGM: Ovarian cancer. MGF: Prostate cancer. MU: Skin cancer (basal cell, face).**

DONOR LAB RESULTS

Chlamydia: **Not Detected**

Gonorrhea: **Not Detected**

Syphilis: **Non-Reactive**

HIV 1 & 2: **Non-Reactive**

CMV total antibody: **Positive***

Hepatitis B: **Non-Reactive**

Hepatitis C: **Non-Reactive**

HTLV 1 & 2: **Non-Reactive**

Urinalysis: **Normal**

Chem panel: **Normal**

CBC: **Normal**

**CMV IgM is negative/IgG positive. This combination shows a historic CMV exposure and donor is presumed to currently be non-infectious*

GENETIC SCREENING RESULTS: ALL TEST VALUES IN NORMAL RANGE

Genetic screening tests can significantly reduce, but never completely eliminate, the chance that a person is a carrier for a particular disorder.

Cystic Fibrosis: (> 500 mutations)

No mutation detected

Spinal Muscular Atrophy (SMA):

Two copies of SMN1 detected

Hemoglobinopathies/Thalassemia:

No abnormal hemoglobin detected (including sickle hemoglobin);

No evidence of thalassemia

Bloom Syndrome:

No mutation detected

Canavan Disease:

No mutation detected

Familial Dysautonomia:

No mutation detected

Fanconi Anemia Group C:

No mutation detected

Gaucher Disease:

No mutation detected

Niemann-Pick Disease Type A:

No mutation detected

Mucopolysaccharidosis Type IV:

No mutation detected

Tay-Sachs Disease: (67 mutations)

No mutation detected

DONOR NARRATIVE: 4809

The content of this narrative has not been altered by TSBC staff and therefore reflects original written work of the Donor

Describe your personality: introvert, extrovert, funny, serious, goal-oriented, curious, shy, etc.

I am an outgoing, people oriented person who thrives in social settings. I enjoy a strong sense of adventure and am considered a fun individual by those around me. This translates to a thirst for life, and an enjoyment of living. Solitude and being an introvert are not foreign to me as well, hiding away with a good book when the world gets tiring. Often complimented for being a kind person, I enjoy helping others and seeing the people around me happy. Speaking of, I am a rather optimistic individual who sees so much good and positiveness in this world, despite the understanding of what is wrong and needs to be changed.

What are your interests and talents?

The outdoors and traveling are things that drive me and give me passion, interjecting into my work and my hobbies. This has shown itself in traveling and backpacking around the world and a thirst for adventure. I enjoy backpacking, mountain biking, hiking, snowboarding, and trying my hand at any sport that comes along. I also do have a passion for groups, both leading groups on adventures and bringing large groups of people together. Literature, and especially more classic literature is something that I have always enjoyed as well, with the works of Alexandre Dumas, Victor Hugo, and Stendhal among my favorites.

What are some of your goals and ambitions in life? Where do you see yourself in 5 or 10 years?

My main goal in life would be to continually grow as I live my life, to continually improve upon myself. To live a full and fulfilling life while still being productive. My current ambitions are to, after finishing my degree, live in either Japan or western Europe for a few years as well as build up the experience required to (and get hired to) run and manage a summer camp for a few years. I plan on seeing as much that this world has to offer as I can for as long as I can.

How would you describe your skills and interests in the following areas?

Math: Though someone who was in quite advanced math for many years and was always leading the pack in my younger years, math has never been something that is a true passion of mine. As the years go on and as I get older I have found other things to put my energy into.

Mechanical: I was raised in a family that was very mechanically oriented, and this is something that I have picked up from them. I enjoy working with my hands and building things. Almost always when I do not have the knowledge to do something I can go look it up and simply follow directions to sort it out.

Athletic: I have always been fairly athletic, and since the start of high school I have turned from someone who enjoyed being active to someone who excels at sports and loves the outdoors. I am a very athletic individual.

Musical, Artistic, Creative: Music has always been one of my passions, though I have never spent much time playing or learning instruments. I have always been at least mildly artistic and would consider myself a very creative individual. This shows itself in how I act, I talk, solve problems and interact with the world.

Language (what languages besides English do you speak?): I used to be quite proficient in Sign Language and hung out with a portion of the deaf community in Fremont, as well as being fairly good at starting to pick up any language I am around for a little while.

Writing: Writing has typically been a strong suit of mine, not solely based upon diction or word choice but with freedom of thought and speed at which I could express what is needed with words.

Literature: I have always been an avid reader, and I love literature. Though I do love a good fantasy novel my true interest and passion lies in classic literature. As mentioned earlier some of the classic French novels mark among my favorite though novels such as from Herman Hesse are not to be forgotten.

Science: Being raised by biologists, either by profession or passion, has made its mark on me. Most of my life has been spent around this subject and has taught me lots about biology, though (I think in part due to being continually surrounded by it) it is not a passion of mine.

On a deserted island and could only have one book, one movie and one album...

Movie: *Casablanca*

Book: Les Miserables, Victor Hugo

Album: *Around the Well*, (Iron and Wine artist)

What are some of your reasons for becoming a sperm donor?

I think it is a good cause, and something that I can help with. Not to sound pompous or arrogant but more than once I have been complimented on having good genes and being lucky with these regards. Its a good thing to help with, and the broader the selection for potential parents-to-be the closer they get to what they want.

Did you choose to be an Identity-Release® Program donor?

Yes No

Why did you make this choice?

Anything that would help a future child that I helped in creating, or any kid for that matter is something I am in full support of. It's not giving anything more of me to give out that information and helping along any donor recipients and children with this is something I would be more than happy to do. I imagine it could be very tough on a child if they wanted to ask some questions about their ancestors or where they come from and not be able to receive those answers.

Is there anything else you would like to share with participating families and offspring?

To never stop appreciating life, and to live your life to the fullest. Never stop loving your parents even if you don't always get along and to do well in school. Planning for your future as you're trying to grow up can seem like a pain but it pays off. Also, life is what you make it not what you see it as.
