DONOR PROFILE: 4355

The past and current personal and family medical history, physical examination, and laboratory test results determine that donor **4355** is eligible and approved for semen donation at The Sperm Bank of California. This profile was prepared in **April, 2010**.

PERSONAL INFORMATION

Identity-Release[®] Program: **Yes**
Month/year of birth: **October, 1988**
Education: **Currently completing B.A. in Economics/Business**
Current occupation: **Student, Bee Keeper**

PHYSICAL CHARACTERISTICS

Height: **6' 4"**
Weight: **188 ½ lbs**
Hair color: **Dark red**
Hair type: **Wavy**
Eye color: **Blue**
Complexion: **Fair/Rosy**
Body type: **Medium**
Ethnic origin: **Irish, English, German, Native American**
Religion: **None**
Blood group/Rh: **A+**
Baby photo available: **Yes**
Other defining features: **Donor states that he resembles basketball payer Bill Walton**

FAMILY MEDICAL HISTORY KEY:

D donor **Ch** child **F** father **M** mother **S** sister **B** brother
Co cousin **A** aunt **U** uncle **MGF** maternal grandfather
MGM maternal grandmother **PGF** paternal grandfather **PGM** paternal grandmother

Genital/Reproductive: **MGF: Prostate cancer diagnosed at 76, no treatment, cause of death at 80.**

PGF: Prostate cancer diagnosed at 76, no treatment, died at 78.

Metabolic/Endocrine: **MCo: Diabetes, juvenile onset at 10, managed with medication.**

Neurological: **PGF: Stroke at 81, died at 84.**

Sight/Sound/Smell: **D: eyesight: R: 20/15 L: 20/20, Cholesteatoma (inner ear cyst) developed at 16 due to ear tubes as a young child, surgery for a prosthetic inner ear, currently hearing is fine.**

Skin: **D: Acne during teen years, no treatment needed, resolved. B: Acne during teen years, no treatment needed, resolved. M: Melanoma diagnosed at 41, treated with surgery, no reoccurrence.**

Cancer (see above): **M: Melanoma diagnosed at 41, treated with surgery, no reoccurrence. MGF: Prostate cancer diagnosed at 76, no treatment, cause of death at 80. PGF: Prostate cancer diagnosed at 76, no treatment, died at 78.**

Other: **S: born prematurely at 25 weeks due to incompetent cervix during pregnancy, died at birth.**

DONOR LAB RESULTS

Chlamydia: Negative	Gonorrhea: Negative	Syphilis: Nonreactive
HIV 1 & 2: Negative	CMV total antibody: Reactive*	
Hepatitis B: Negative	Hepatitis C: Negative	HTLV 1 & 2: Negative
Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative

*Other: **CMV IgM is negative/IgG positive. This combination shows a historic CMV exposure and donor is presumed to currently be non- infectious.**

DONOR NARRATIVE: Donor # 4355

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am a modest, positive and easy going guy who gets along with others. I'm goal-oriented and serious with my studies, but my house mates, friends and I have a good time hanging out and talking. I might come across a little shy, but I'm happy to talk to anyone in the mood. I enjoy learning and hearing stories from others.

I have a very competitive nature, but I don't let it spark confrontation especially in situations that aren't important. I love the outdoors and being productive while having fun. I can always keep myself entertained, gaining something from every situation. I enjoy animals; I've lived with them all throughout my life.

What are your special interests and talents?

I enjoy going to the beach surfing/boogie boarding, watching movies and documentaries, gardening, cooking, running, swimming, triathlons and bee keeping. Bee keeping is one of my newest passions which brings together so many other disciplines. I love learning about bees, how to melt the wax and make candles, collecting honey, making bee hives, and much more.

I was very good at baseball as a hitter and pitcher. I had a 600 batting average on my travel teams (probably a little higher on travel teams because people didn't know or pitch around me) and a 21 win streak in pony (8th grade age) which included into All-stars. I think one of the few things I didn't do was hit a cycle, but I've hit a grand slam, pitched no-hitters, and many shutouts. For the longest time I thought I was going to be a baseball player, but ran track the 2nd year of high school before seeing how far I could go in baseball. I'm also a talented swimmer. I learned early and have always been doing it to some extent.

Another aspect that has really helped me is learning about health and nutrition through the book "Never Be Sick Again" by Raymond Francis and mercola.com.

How would you describe your enjoyment of and skills in the following areas:

math: Overall, I enjoy math, especially the real world applications. At different stages of my life math could require more practice than others, but once you get it and are proficient, math is bliss. My highest SAT score was in math.

mechanical: I'm good with tools and building things. More recently I have expanded in this area with building bee hives and soon I'll be welding.

athletic: Very athletic. Comes very naturally. For the majority of the time when put into a new situation that requires physical or athletic skill I can do it very well for a first timer.

musical, artistic, creative: I didn't really get into music until college when my roommate gave me some music, and I've been collecting since. I'm fairly creative, but not necessarily expressing it through artistic means.

language (what languages besides English do you speak?): None.

What are your goals and ambitions in life?

At age 20 some of my goals include doing well in collegiate athletics, expanding my bee hobby, and graduating college with a double major. To expand on my bee hobby for this upcoming winter, I'm looking for a welder so I can make and sell two frame honey extractors. I think that will be a cool experience that supplements in the business I'm learning in school.

After college I'm planning to get a job which might be in finance. I want to build my wealth so I'm able to support a family. One of my main ambitions in life is to be the best

husband and father I can. I want to be involved in my kid's lives similar to my dad who was the head coach of many of my youth teams.

Why do you want to be a sperm donor?

I'm very proud of my family and their accomplishments as well as my own. My genes have done well for me so I'm helping spread good genes in order to help others.

Did you choose to be an Identity-Release® Program donor? **X** Yes Why did you make this choice?

I chose to participate in the Identity-Release program because I'm comfortable with communicating with future offspring through the donor program. There also lies some curiosity on my part, but I feel the offspring should have the option to communicate with their biological parent.

What message would you like us to pass on to the people who are getting your sperm?

If you want an athletic tall kid, I have the genes for that, but a lot of it is more than genes. I had a very supporting family that was always willing to support me in sports, activities, hobbies, school, etc. I would encourage you to enroll your kids in baseball, swimming, Jujitsu, water polo, and any other sports to help develop self confidence among many other benefits. From my success in sports I developed a very high self confidence, giving me the ability to believe that whatever I wanted to do I could do it. Another aspect that empowers the individual is learning about health and nutrition.
