Substance Abuse: **M: Alcoholism at 14, rehabilitation, ongoing. MGF: Heavy drinker at 46, ongoing until death at 70. MA: Alcoholism at 43, treated with 12 Step Program, sober as of 2011.**
Cancer (see above): **PMG: Breast Cancer. PGF: Intestinal Cancer. PU: Pancreatic cancer**

DONOR LAB RESULTS

Chlamydia: Negative	Gonorrhea: Negative	Syphilis: Nonreactive
HIV 1 & 2: Negative	CMV total antibody: Negative	
Hepatitis B: Negative	Hepatitis C: Negative	HTLV 1 & 2: Negative
Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle Cell Anemia/Thalassemia: Negative
Full Jewish Panel: NA		

DONOR NARRATIVE: Donor # 4598

(The content of this narrative has not been altered by TSBC staff and therefore reflects original written work of the Donor)

Describe your personality: introvert, extrovert, funny, serious, goal-oriented, curious, shy, etc.

I am an independent and open-minded individual who makes a supreme effort to provide an equal amount of respect to every person I meet. That personal principle stems from the fact that I genuinely care about those around me. These traits, along with a healthy amount of personal confidence have me become a skilled leader.

I love to be challenged. I have done my best in most difficult classes, and enjoy exercising the skills necessary to solve complex problems. Incorporating and making links to many bits of information is something my brain tends to be good at, and is something I find quite exhilarating. I am a man of integrity that possesses a sharp mind and big heart. I also like to think sometimes that I can be a fairly funny guy, at least on a good day.

What are your interests and talents?

I have a passion for singing and acting. I like to think I'm pretty good at those things too, playing roles such as Jean Valjean and Sweeney Todd without any formal training. Throughout college, I have been on the board of directors of a student theatre company, and it has been the most rewarding extra-curricular activity I have ever done.

I also enjoy outdoor activities, like camping, hiking and sailing. While this interest began while I was in my scout troop, I am determined not to lose it from my adult life, and go to national parks on as many weekends as I can muster.

What are some of your goals and ambitions in life? Where do you see yourself in 5 or 10 years?

My primary goal is to become a medical doctor. Currently in the process of applications, I should be finishing medical school in five years and a practicing physician in ten years. A motivation to help people in the most basic way I can think of has pushed me to becoming a doctor.

I hope to be very active in my community as a physician. I really want to extend my impact on whatever community I end up in beyond the hospital I will work in.

How would you describe your skills and interests in the following areas?

Math: I have above-average mathematical skills, but I am not particularly passionate about the subject. I enjoy the logical thinking and marvel at what mathematics can do, I just don't necessarily want to be the one to do those amazing complex things.

Mechanical: I would say I have slightly above average mechanical skills. I repair computers and laptops, which requires a steady hand, but I lack enough experience with things like cars to really assess whether or not I really have a knack for mechanics.

Athletic: I am an average athlete. I can hike with the best of them, but when it comes to running and thinking at the same time, my body is not always the most cooperative.

Musical, Artistic, Creative: These areas are where I really think my talents are. As I said before, I consider myself a talented singer despite not having any training, and I love the creative process of any theatrical production.

Language (what languages besides English do you speak?): **Unfortunately, none. But I'm working on Spanish!**

Writing: **I am an effective and efficient communicator. My writing reflects this and is clear and focused.**

Literature: **My ability to analyze literature is above average, but not the best in the world. There is a reason I've been chosen to be a doctor and not a rhetorical expert.**

Science: **I am both very good at and passionate about science. While biology is my favorite field, the quest for knowledge that characterizes all sciences is what I truly love.**

If you were stranded on a deserted island and could only have one book, one movie and one album, what would they be?

Movie: **Forrest Gump**

Book: **Harry Potter and the Deathly Hallows. Or the Bible.**

Album: **"Next to Normal" Original Broadway Cast Recording**

What are some of your reasons for becoming a sperm donor?

I look forward to the opportunity of helping couples have a family they otherwise could not have. Also, for a full disclosure, budget cut are in full swing and I have had to look for many ways to increase my income to fund my way through college.

Did you choose to be an Identity-Release® Program donor? Yes No

Why did you make this choice?

I put myself in the place of a future sperm-donor-conceived child , and decided that if it were me, I would much rather have the option to learn more about my genetic parent rather than bluntly told "no" when asked for more information. I think I should give them the same chance I would want in their place.

Would you like more information on our Identity-Release® Program? Yes No

Is there anything else you would like to share with participating families and offspring?

My opening paragraph is as accurate a reflection of me right now as I could come up with. It's actually an excerpt from one of my medical school applications. I truly believe in the absolutely amazing potential of every human being on this planet, which is why I want to help people live as healthy of a life as possible. Sorry that sounded so cheesy, but it's true.

Also I think everyone in the world should do at least *one* musical in their life because of how wonderful they are.
