Cystic Fibrosis: **Negative** Tay Sachs: **N/A** Sickle cell anemia/thalassemia: **Negative**
Other: **CMV urine culture negative, donor is presumed non-infectious**

DONOR NARRATIVE: Donor 2759

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

In any given situation, I'm probably a little reserved until I have things figured out. Then it's full steam ahead! Let the jokes fly, have fun with whatever it may be. If I find something that I'm interested in I really go after it, whether it be a hobby, sport, project or comparison shopping. I'm on it trying to make it as good as it can be.

What are your special interests and talents?

I'm very interested in science and nature. I love watching the Discovery Channel. Science fiction is fun for me as well. The world we live in is a wonderful thing and the more I learn about it the more incredible it seems. I like gardening, woodworking, cooking and just about anything where you can take a step back and say "wow...look at that!" I also enjoy running, lifting weights, hiking, tennis and scuba. Scuba diving, I have to say, is one of the most sensational things someone can do. The sights and sounds are incredible. I'm good at problem solving and figuring out the best approach to any given situation.

How would you describe your enjoyment of and skills in the following areas:

math: This was always my strongest subject matter up until college. At that time, I left it behind for more "interesting" classes. I kind of wish I stuck with it. It is truly the universal language and its application at the higher levels are astounding.

mechanical: I'm very mechanically inclined. I love figuring out how something works. Or better yet fixing something that is broken. I'm a "do-it-yourselfer". At one time, I even put a new engine into my truck...just me and the manual. I get great satisfaction upon completing a project/mechanical task.

athletic: I love contact sports. I played ice hockey when I was younger and then Lacrosse in college. I was always the highest scorer at season's end and have a little trophy collection. My greatest asset in athletics was/is how fast I can run. I miss playing rougher sports and am now focused on tennis.

musical, artistic, creative: I am not musically inclined at all. I do however, like to listen to a wide variety of it. I'm not very artistic either...no good at painting or drawing. I consider myself very creative. I've solved many problem using creative 'alternative' approaches, improvising with materials on hand and using them in innovative ways.

language (what languages do you speak?): English and a little bit of Spanish. I can understand a conversation in Spanish but fumble for words trying to speak it.

What are your goals and ambitions in life?

To enjoy life to its fullest. Learn, explore, experience and share along the way. Doing the right thing in any given situation has always been important to me. One day, I hope to raise a family of my own. I have yet to meet my true love and finding her will soon be a priority. Right now I'm at a crossroads in life. Finding a better job/career that I like and want to throw myself whole heartedly is something I hope to accomplish soon.

DONOR NARRATIVE: Donor 2759 (cont'd)

Why do you want to be a sperm donor?

At first it was to get “easy” lunch money. But after thinking about it, I’d really like to pass on my genetics. I feel that I’m gifted both athletically and academically. Also, it goes along with my feelings/attitude of sharing. This is in a way one of the ultimate ways of sharing; the giving of me and my heritage. I feel sorry for those that can’t reproduce with their mate or don’t have one to do so. If they have to get help with programs like this, I feel that I’m a good candidate.

Did you choose to be an identity-releasesm donor? yes ___ no. Why did you make this choice?

I chose to be an identity-release donor out of consideration for the offspring. If I were in their shoes, I would want to know where I came from and be able to meet my donor. It would give me a better understanding of who I was and satisfy a burning curiosity. I feel it would be totally unfair not to give someone this choice.

What message would you like us to pass on to the people who are getting your sperm?

[Donor chose the leave this blank]
