Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: N/A	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor 2789

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

In general I would say I am an introvert but once I am comfortable with somebody it is easy to open up. I definitely tend to live in the moment and observe all around me. I can have a very humorous take on life at times and love to share this with others. I am definitely a sponge of the world and am always taking notes.

What are your special interests and talents?

My greatest passion lies in the creation of art and art objects. I love photography, painting, sculpture and film art creations. I love using my own two hands to create imagery and objects that are a reflection of emotions and expressions. The arts are my greatest passion in this world. In addition to the visual arts, I am a musician and music lover. I feel music is perhaps the most widely appreciated art form in the world. If there is anything I love to do on my time, it is experimenting with musical forms.

How would you describe your enjoyment of and skills in the following areas:

math: I was always a math and science guy in high school more than languages or english. I definitely excelled in math and science related fields.

mechanical: My mechanical sense is fairly extensive. I have always enjoyed building with tools and various materials. This, in addition to being a bike rider has shaped my mechanical skills quite well.

athletic: Although I play no team sports now, I still keep quite active. I exercise regularly and am in love with bikes and biking. I try to ride every single day, whether it is to the grocery store or on the trail.

musical, artistic, creative: I have dedicated my life to the arts as a photographer and painter. If I hope to excel in any direction in my life, it is as an image maker and artist. I am also a guitarist who loves to play more than anything else.

language (what languages do you speak?): I speak very little Spanish but am very intrigued with Latin, as it is the basis of all romantic languages.

What are your goals and ambitions in life?

Being a successful artist is my ultimate goal in life. This means I would be able to live off my art creation while I would also be pleased in every creation I made. I simply want to be remembered past my own life in my creative artworks.

Why do you want to be a sperm donor?

I simply want to help those without the ability to do so. I have several lesbian friends who have spoken to me and shared their willingness to have a child of their own. I realize that not everybody is fortunate to be perfectly healthy and capable. The spare cash is a definite perk at this time as well.

Did you choose to be an identity-releasesm donor? yes ___ no. Why did you make this choice?

I simply feel it is necessary to follow up with such a decision. It adds another dimension to the notion of family.

What message would you like us to pass on to the people who are getting your sperm?

I want them to know I am right along with them in spirit in the creation of a new life form. This new person will be a character of unparalleled personality and creativity. When the time is right we will hopefully connect and share each other's company.
