Donor 2938
Interview Notes

Donor 2938 seemed like a shy person, but as our interview went on he began to open up a little more. He told me that he is aware that it is hard to get an impression of him since he is not very talkative the first few times he meets people. Donor 2938 described himself as having an introverted personality, but he definitely also has an extroverted side: he plays in a band and performs frequently on stage. His passion is music. He plays the guitar, piano, drums, base and saxophone. His other passions are collecting records and traveling.

I was impressed by the Donor's gentle sense of humor, and by the thoughtful questions he asked about the donor screening process.

Interviewer: Petra Schirra

Date: February 6, 2004
