Chem panel: **Normal**

Tay Sachs: **Negative**

Syphilis: **Nonreactive**

HTLV 1 & 2: **Negative**

CBC: **Normal**

Sickle cell anemia/thalassemia: **Negative**

DONOR NARRATIVE: Donor 3796

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am someone who is fun and outgoing person, and enjoy being with immersing myself with interesting people. I have a great sense of humor, which can border on sarcastic and wry, but people find it amusing. I have an adventurous and entrepreneurial streak, which has led me to being part of a small business in the hospitality sector. I am looking into starting other businesses as well, as I am someone who enjoys the challenges of hard work and being one's own boss.

What are your special interests and talents?

Traveling is my huge interest of mine. I have had the opportunity to backpack or travel to each continent (except Antarctica). Other interests include cooking, sports, music, yoga, working out and crossword puzzles.

How would you describe your enjoyment of and skills in the following areas:

math: I am a good math student especially in math dealing with finance and accounting. I have struggled at times with higher-level algebra, but have always passed with good grades with a little extra effort.

mechanical: I am definitely not the engineering type; however, I have always been able to put things together as long as it is not more advanced than IKEA.

athletic: I have run the SF Marathon in 3 hours and qualified for the Boston Marathon. I played collegiate tennis and have always had a knack for many sports ranging from soccer, baseball to bowling. I continue to be athletic and go to the gym to lift weights, cardio, and yoga up to five or six times a week.

musical, artistic, creative: I took both piano and saxophone lessons as a child and did well, but I did not continue with either after a few years. I taught myself how to play guitar in my late teens. As for creativity, I have plenty of this and was always the idea man during group projects during my MBA. My creativity has helped with business and coming up with marketing and business strategy.

language (what languages do you speak?): I am a native English speaker and started learning Spanish (intermediate level) when I lived in Spain for a year. I plan to become fluent over the next few years.

What are your goals and ambitions in life?

My goal is to start my own business within the next six months. Having gained expertise in the hospitality industry I have been targeting this industry and have several ideas for businesses within the Bay Area. Another goal I have is to continue to give back to the community by working with non-profits and other organizations. Also, I would like to have a happy and healthy family one day.

Why do you want to be a sperm donor?

When I first learned about the program I thought it would be a great way to pass on what I feel are good genes and help people out who are having trouble conceiving or are unable to. It is also nice to be able to supplement my income while helping people out.

Did you choose to be an identity-release donor? yes no. Why did you make this choice?

I am currently undecided about the Identity release Donor Program. I am thinking about the program, and want to be 100% comfortable with it before opting for it.

What message would you like us to pass on to the people who are getting your sperm?

Good luck (only kidding)! I hope that you have a happy and healthy child that provides you with nothing but joy and happiness.
