DONOR NARRATIVE: Donor 3869

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

Mix of introvert/extrovert (middle of the road), tend to be mostly funny, but be serious if needed, extremely curious, and bound by logic (always wondering how things work), never like people who don't try to solve their problems and just complain about it.

What are your special interests and talents?

I enjoy politics and philosophy immensely, and therefore I enjoy arguing about them. I am also an amateur artist, and am try to help make a comic with some friends. Also I am an alternative musician with a superb ear, so I can distinguish sounds easily.

How would you describe your enjoyment of and skills in the following areas:

math: **Math is easy for me until I get to where I stopped learning.**

mechanical: **Being so curious, I can generally reverse- engineer complex mechanics with little difficulties, and although I have no training I can attempt rudimentary car repairs**

athletic: **I am not one for petty competitions anymore, but I did swim competitively for most of my childhood and adolescent life.**

musical, artistic, creative: **I have a great ear for music and I am definitely more creative than most people, due to the fact I grew up with legos and I took art for 7th grade to graduation.**

language (what languages do you speak?): **I have good mastery of the English language, but that's it.**

What are your goals and ambitions in life?

My immediate goal is to provide for myself and my fiancé a good life, but I would love to start cooking or get into politics.

Why do you want to be a sperm donor?

Because there are too many people who can't reproduce naturally, and someone needs to provide them with a chance.

Did you choose to be an identity-release donor? yes ___ no. Why did you make this choice?

Because I think it would be t he coolest to meet someone that holds my genetic code and see who they grew up to be.

What message would you like us to pass on to the people who are getting your sperm?

The child you are about to bear has all the potential in the world. Give them the best chance they have.
