Skin: **Donor and relatives: Minor Acne in youth, no adult acne or scarring.**

Cancer (see above): **MGF: Pancreatic Cancer. PGM: Breast Cancer.**

DONOR LAB RESULTS

Chlamydia: Negative	Gonorrhea: Negative	Syphilis: Nonreactive
HIV 1 & 2: Negative	CMV total antibody: Nonreactive	
Hepatitis B: Negative	Hepatitis C: Negative	HTLV 1 & 2: Negative
Urinalysis: Normal	Chem panel: Normal	CBC: Normal
Cystic Fibrosis: Negative	Tay Sachs: Negative	Sickle cell anemia/thalassemia: Negative

DONOR NARRATIVE: Donor # 4082

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am an extrovert, although I also really enjoy my alone time. In a group I am often the leader, and will be very goal-oriented. In social settings I have no problem talking to strangers and moving outside my normal comfort zone. I am very stubborn in that once I set my mind to something I will always accomplish it. I am willing to try new things, be it experiences or food. I am a very logical person and often find myself rationalizing behaviors. I am almost never angry and usually in a good mood. Finally I am very loyal and trusting of my friends.

What are your special interests and talents?

I am an Eagle Scot and love all aspects of the outdoors; camping, fishing, hiking, hunting, I like it all. I play most sports although I love soccer, hockey, and diving. I am always reading books in my free time. Artistically I am not very active although I like to whittle and build models. I like to play chess, and to solve rubik's cubes, but I prefer videogames over both. I have great skill in technical activities: I have built my own computer, programmed games, designed sets for plays, and built a house with help from 4 other people.

How would you describe your enjoyment of and skills in the following areas:

math: **Math is definitely my favorite subject. It has always come easily and I not only enjoy it, but I also excel at it.**

mechanical: **I am quite adept at repairing basic cars (older ones) and I am fixing up a motorcycle.**

athletic: **I am an all around athlete. I have always excelled at games of speed and finesse but never in ones of strength.**

musical, artistic, creative: **I enjoy music and art but I'm not a practitioner. My creativity comes out in my daily life, and in the activities I enjoy. I always have a plan or something new to do.**

language (what languages do you speak?): **French**

What are your goals and ambitions in life?

Right now my goals in life centers around school and starting my career, but at the end of my run I want to have left my mark on the world. The best way I see to do this is to have a family. As far as my ambitions go is they are endless. I can see myself doing anything right now and succeeding at it. At this time in my life the world is my oyster.

Why do you want to be a sperm donor?

I wanted to be a sperm donor for several reasons. First of all, I want families who are unable to produce children of their own to have the chance to receive a child that comes from one of them. This ties in with my goal in life and how if me and my wife happened to be infertile I would still want to have children. The last reason is that I think that the sperm donor program is the best way to accomplish so that the couple can pick the biological father for their child.

Did you choose to be an identity-release donor? **NO** Why did you make this choice?

I feel like your genetics don't make who you are. It is people around you that shape your life. My role in the child's life is only a small one compared to developing a young mind to its full potential.

What message would you like us to pass on to the people who are getting your sperm?

I wish the best of luck to you in raising your child.
