CBC: **Normal**

Sickle cell anemia/thalassemia: **Negative**

DONOR NARRATIVE: Donor # 4157

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am a light-hearted soul, with a serious side. My gratitude for my family and friends brings them closer into my life. Taking the time to learn, explore, and experience those people enlightens my world. My devotion and love toward my wife is almost beyond words, she is my avatar, my inspiration for life and love. I take my dreams/ambitions very seriously. My drive is fueled by my passions, I have been fortunate enough to find a career where I can express myself on a daily basis. The serious side of my personality allows me to take responsibility for the mistakes I make and the ability to correct them. When the opportunity to listen is presented, I can shed wisdom on the situation from a realistic and sensitive point of view. This balance allows me to have a positive/ healthy outlook on life.

What are your special interests and talents?

Design: the process and final outcome of creating a product of balanced form and function. I enjoy the creative process, problem solving, visual communication, and refinement. My natural inclination leans toward problem solving, but I also use my artistic talents and technical abilities to express my designs. This allows me to be an effective designer.

Athleticism: Climbing and mountain biking. I find using my entire body as a balanced whole is very rewarding. Climbing feels like a body puzzle to me, a puzzle everyone has to solve for themselves. An interesting aspect of climbing is it is balance driven not strength orientated. This gives me a chance to find new ways of utilizing my balance while riding gives me a chance to satisfy my need to go fast and push my technical abilities. Plus, I love bikes, I think they are an amazing vehicle on many levels. These activities allow me to be outdoors, this gives me a chance to find a level of peace away from the day to day hustle. It gives me a chance to think and reflect as well as keep my body healthy.

How would you describe your enjoyment of and skills in the following areas:

math: **Moderate: Mathematics is fascinating to me. A universal language that helps explain our universe.**

mechanical: **Extremely enjoyable. Its very satisfying to problem solve on a physical level.**

athletic: **Sense of speed and self-awareness through riding and climbing are a few passions in my life.**

musical, artistic, creative: **Artistic expression is critical in my personal and professional life.**

language (what languages besides English do you speak?): **None**

What are your goals and ambitions in life?

Family, love, and sharing my life with the amazing family and friends close to me. Expanding my world and finding an artistic way of contributing to the world.

Why do you want to be a sperm donor?

The ability to be selfless in a very giving way.

Did you choose to be an identity-release donor? **Yes**

In fairness to the offspring, the ability to have a complete understanding of where we come from physically and emotionally is paramount to how and who we define ourselves.

What message would you like us to pass on to the people who are getting your sperm?

This paperwork is only as small glimpse of who I am as a person. I can say that a large portion of who I have become comes from the environment of my family. Although not perfect in many ways, the foundation of love helped me to become a healthy person, emotionally, mentally and physically. I can only imagine what you have gone through to get to this point, but I do understand it must be significant. I hope the determination and love that has brought you this far will help you create the environment need for a child. Genetic endowment will only take your child so far, the rest is up to you. Your responsibility to love, care and have patience is imperative. I wish you the best of luck with your family.

Regards,

Donor 4157
