DONOR NARRATIVE: Donor # 4170

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

I am extremely creative and inventive with a passion for the arts. I am a people person who needs to be around others for stimulation. I love to laugh and to make others laugh as well. I have been described as a comic cynic with a sharp wit. That being said, I am very compassionate and sensitive to others feelings. I am very goal-oriented and competitive when it comes to academics and all aspects of the visual arts. Ultimately I am fun-loving, hopeless romantic who enjoys fine food, good company, and the love of close friends and family.

What are your special interests and talents?

I was a natural born artist; art picked me, I did not pick it. I began drawing at age 6. Art has always been a part of my life and it is my first love. I enjoy working with my hands and I have a high mechanical aptitude. I am also a bit on the musical side. I'm no Mozart, but I have a good ear and I enjoy playing guitar for relaxation. I am happiest and feel the greatest sense of accomplishment when am able to build something from the ground up.

How would you describe your enjoyment of and skills in the following areas:

math: **I was always great at math as a child and I was probably above average at the collegiate level. Although I have no use for the abstracts, I enjoy algebra and use general math to problem solve almost daily.**

mechanical: **I have always enjoyed taking items apart and putting them back together. I have an inherent curiosity for how things work. I am also excellent with tools and enjoy building things very much.**

athletic: **I was never a star athlete, but I played soccer as a child and I enjoyed basketball all through high school. I am very competitive by nature, but I prefer to engage in sports for exercise, such as weight training and yoga.**

musical, artistic, creative: **I have always been very creative and imaginative. I am an accomplished artist and I work in the arts for a living. I also enjoy playing electric guitar for fun.**

language (what languages besides English do you speak?): **I speak enough Spanish to get by.**

What are your goals and ambitions in life?

I have always been very goal oriented and probably had my entire life planned out by age 15. I want to work in the film industry in a creative facet such as animation as well as teach as teach down the road. My love of laughter and working with others draws me towards the animation industry and also towards teaching at the collegiate level. In the end, I want to use my talents to make others laugh and I want to have the flexibility in my career to be able to travel the world with my beautiful fiancé by my side.

Why do you want to be a sperm donor?

Although I do not anticipate raising a family of my own, I believe that anyone who wants to be a parent should be given that chance. I would be honored to help any person or couple wanting to take on the challenge of raising a family and I would love to help them make that dream come true.

Did you choose to be an identity-release donor? No. Why did you make this choice?

At this stage in my life, anonymity is very important to me.

What message would you like us to pass on to the people who are getting your sperm?

If you choose me as a donor I am certain that you will have a beautiful, healthy baby who will be the love of your life. I wish you the best of luck starting or continuing your family with lots of love, laughter and cheer.
