Cystic Fibrosis: <b>Negative</b>	Tay Sachs: <b>N/A</b>	Sickle cell anemia/thalassemia: <b>Negative</b>

## **DONOR NARRATIVE: Donor # 4289**

Describe your personality (introvert, extrovert, funny, serious, goal-oriented, curious, etc.).

**First and foremost, I care about people. I empathize with the plight of those less fortunate than myself, and as such I have a good heart. I'm passionate about things/people I care about and try to live my life accordingly. Some people may disagree, but I think I can be pretty funny. At the same time I'm serious in that I don't like to waste time doing things that aren't productive in some way (I consider cultivating relationships productive). I'm athletic and enjoy sports. I'm well-mannered and polite and try to be considerate of those around me. I think in general I'm an extrovert with introvert tendencies, if that makes any sense! I've been known to have a philosophic streak every now and then.**

What are your special interests and talents?

**For my whole life I have played soccer, run, and been generally involved with sports in some capacity. I love watching my hometown baseball, basketball and football teams play. I am also very much interested in music, in several capacities. I love listening to music whether it be rock, jazz, blues, folk, world music or any others. I played the saxophone growing up and now play the guitar. I love languages. I spoke Russian in college and lived in Russia for a spell and am not beginning to learn sign language, in which I've become very interested. I'm also interested in the common good. I'm interested in public health, I read the news and follow the political occurrences daily. I love the outdoors, the forest and the ocean.**

How would you describe your enjoyment of and skills in the following areas:

math: **When I was in school I liked Math, I was actually on the Math Team in middle school and pursued higher math courses in college.**

mechanical: **I am not, to say the least, mechanically inclined. I can set up basic electronics but that's about it!**

athletic: **When I was young I played basketball, baseball and soccer. I've played soccer my whole life, captaining the varsity soccer team in college. I also ran track in high school.**

musical, artistic, creative: **When I was in school I played the saxophone and have now been playing the guitar for over a year and a half. I love listening to and making music.**

language (what languages besides English do you speak?): **Russian**

What are your goals and ambitions in life?

**My goals in life are simultaneously ambiguous, well-intentioned, ideological, yet somehow defined. I want to help. I want to help those less fortunate than myself because everyone deserves a helping hand. I'm not quite sure what form this will take, right now I have dreams of international public health, fighting homelessness, combating AIDS, feeding the hungry, and finding world peace. Which one of those will be realized and which won't is for the future to decide. The world, unfortunately, is not short on problems.**

Why do you want to be a sperm donor?

**For all of the unwanted pregnancies that occur, it's refreshing to know that there are good people who want to have children and who want to be good parents. The world needs more good kids and definitely needs more good parents, so I hope my donation can contribute to making the world a little better. It can be extremely frustrating to try to have a child and not be able to, and for me to be able to provide that service is a no-brainer. I hope that whoever receives my genes leads a long and fulfilling life.**

Did you choose to be an Identity-Release® Program donor?   X   Yes \_\_\_\_ No.

Why did you make this choice?

**If my parents had needed a service such as a sperm bank I would be very curious who my biological father was. I think of it as a child's rights. Also, I would be very much interested in meeting a child carrying my genes**

What message would you like us to pass on to the people who are getting your sperm?

**Good Luck! For my part, I can only hope to be as good a parent as my parents were to me. Being a parent is a lot of work, but the right amount of love and dedication is a recipe for success. Something my dad taught me- discipline is love. I was always taught that if I did well in school I could pretty much do whatever else I wanted. I wish you all the success in the world; if he's anything like me you should put a soccer ball in his crib!**
