Cystic Fibrosis: <b>Negative</b>	Tay Sachs: <b>N/A or Negative</b>	Sickle cell anemia/thalassemia: <b>Negative</b>

## **DONOR NARRATIVE: Donor # 4350**

Describe your personality.

**I would most definitely describe myself as an extroverted person. I enjoy being in crowds and when I'm in them I often find myself at the center of their attention. I love being the entertainer at parties and I've found that my love for it is also coupled with a knack for it. When working on projects I find myself taking charge of the group and delegating tasks so that the job can be finished quickly and efficiently. I pride myself on quality work and regardless of the job I'm doing, if I'm doing it I make sure it's done well.**

What are your special interests and talents?

**I love being on stage and entertaining people. If the audience is 5 people or 500 people, I don't care. I simply love entertaining people. As a result of my countless endeavors on the stage, I am very good at public speaking and have no trouble speaking in front of a class or the entire school.**

**I played tennis in high school for three years and I won the Tennis Team MVP award 3 times. My natural body build is not exactly that of a tennis player, more so a linebacker, but tennis was the sport I played as a kid and I stuck with it and excelled. My memory has always served me well in school and on tests. I rarely ever found it necessary to take notes and still found myself at the top of my classes. I'm a very good listener and I have done well in my life by not letting the little things get me down.**

How would you describe your enjoyment of and skills in the following areas:

**Math: I find a great deal of enjoyment in math and I have always excelled in it. It has always been something that has come naturally to me.**

**Mechanical: Not so much.**

**Athletic: I love sports. As I mentioned I played tennis in high school and excelled it. I played basketball in junior high, but decided to participate in theatre in high school, which cut into basketball season, and left me choosing the arts over basketball.**

**Musical, artistic, creative: I love theater productions. I love participating in them. I love watching them. I love watching them. Love reading their scripts. And I love discussing them afterwards at a quaint little café with my director and a few cast members. I enjoy museums, my favorite currently being The Getty, and I enjoy learning the history of art as well as experiencing the forthcoming wave of modern art. Of these four subjects, this is the one I find myself with the most passion for**

**Language (what languages besides English do you speak?): (Donor did not reply)**

What are your goals and ambitions in life?

**I want to work for the EPA or the DOE and explore alternative energy sources and spread the work about those that are most plausible. Also, I want to work on pursuing a Master's Degree in an earth science so that I can teach at the collegiate level and hopefully inspire future generations to continue a policy of environmental responsibility that will hopefully be established by that time. Later on I would like to run for a public office that would allow me to make environmental policy decisions.**

Why do you want to be a sperm donor?

**I'm doing this because I have a desire to help people around me. Of course this is an interesting step in helping people. I still believe that it is a step that someone has to take.**

Did you choose to be an Identity-Release® Program donor?  Yes \_\_\_ No. Why did you make this choice?

**I put myself in the position in the position of one of my possible offspring and realized that I would feel the need to make some kind of contact with my donor.**

What message would you like us to pass on to the people who are getting your sperm?

**If this process is a success for you then I would like to say congratulations! I have faith that your child will be raised with love and care and with a little luck it should find success in many of its ventures. I believe your child will be capable of nearly anything.**
