Skin: **D: Acne onset at 18, OTC cleanser, ongoing, slight scarring. B: Acne onset at 17, OTC cleanser, resolved. MU#1: Acne onset at 15, OTC cleanser, ongoing, managed.**

DONOR LAB RESULTS

Chlamydia: **Negative**

HIV 1 & 2: **Negative**

Hepatitis B: **Negative**

Urinalysis: **Normal**

Cystic Fibrosis: **Negative**

Gonorrhea: **Negative**

CMV total antibody: **Non-Reactive**

Hepatitis C: **Negative**

Chem panel: **Normal**

Tay Sachs: **N/A**

Syphilis: **Nonreactive**

HTLV 1 & 2: **Negative**

CBC: **Normal**

+Sickle Cell Anemia/Thalassemia: **N/A**

DONOR NARRATIVE: Donor # 4446

Describe your personality: introvert, extrovert, funny, serious, goal-oriented, curious, shy, etc.

I am a quiet person but I do like to meet new people. As a child I was very shy and that turned me into a great listener that people like to talk to. My sense of humor is dry and sarcastic. I like to make fun of my friends and family but that's because I love them and joking around is how we get along and show our love. I actually can't be mean to strangers because I would just feel bad. All of my friends call me the nicest guy they know and I would do anything for them. I have always acted more mature than people my age.

What are your interests and talents?

My main hobbies are photography, film, and travel. Photography is my favorite art medium and I've been shooting since high school. I've loved movies since I was a kid. I love the films of the Marx Brothers, Buster Keaton, Monty Python, Stanley Kubrick, Billy Wilder, Frank Capra and newer artists such as Simon Pegg and Nick Frost, Jason Rettman and Michel Gondry. Travelling is my favorite way to learn about people and the world. I've been all over the country and Europe and hope to do more soon.

What are some of your goals and ambitions in life? Where do you see yourself in 5 or 10 years?

I hope to eventually settle down and have a family but not until I'm 30. After I graduate I want to live outside the country for a while or at least outside the state. There's too much to experience in the world to settle down at a young age. For a career I hope to do anything that allows me to be creative. In 10 years I hope to have enough life experiences so that I can happily settle down and focus on my family

How would you describe your skills and interests in the following areas?

Math: Math was my favorite subject in school. That is until I took Calculus. I got good grades in the advanced classes but I just couldn't take it anymore. I'm still decent in Math.

Mechanical: I love to fix things. Opening stuff up to see how it works is fun. If something breaks I would much rather fix it than replace it.

Athletic: I played baseball as a kid and I still play basketball and football for fun with friends. If I was bigger and stronger I would have continued playing sports competitively.

Musical, Artistic, Creative: I play the guitar and love photography. I drew a lot as a kid.

Language (what languages besides English do you speak?): I only speak English but I got good grades in Spanish.

Writing: **As a child I wasn't a fan of writing but I've become quite proficient in essay and academic writing.**

Literature: **I don't read as much as I used to or should. I do love the works of Kurt Vonnegut though.**

Science: **Like I said in the mechanical section, I love to see how things work. Being able to understand the world around us is fulfilling.**

If you were stranded on a deserted island and could only have one book, one movie and one album, what would they be?

Movie: **Dr. Strangelove**

Book: **Ultra Simple Boat Building by Gavin Atrin**

Album: **London Calling by The Clash**

What are some of your reasons for becoming a sperm donor?

I want to help a family become whole. Everyone deserves the warmth and support of a family and I just want to provide the missing piece.

Did you choose to be an Identity-Release® Program donor? Yes No

Why did you make this choice?

As of right now I am more comfortable being anonymous. I am just not sure what kind of emotions may be involved for any of the people involved.

Would you like more information on our Identity-Release® Program? **No.**

Is there anything else you would like to share with participating families and offspring?

I just want to say good luck and I wish you all the best. To any potential offspring I want to say that learning about your genetic history can be fun, interesting and medically beneficial but you are who you are because of your family and the choices you make. You are your own person so be who you truly want to be. To the parents, remember: There are no refunds if the kid turns out to be a "smart aleck". It's actually an endearing trait... Eventually.
